E-mails
E-mail: uddannelse@adm.dtu.dk

Organisation profile
The Office for Study Programmes and Student Affairs supports the DTU management in connection with education policy issues. The Office is responsible for DTU’s study administration systems, providing information and guidance to students and providing services to DTU’s departments.
We work with:
Admissions
Grant and loan applications
Course and examination enrolment
Student guidance
Industrial projects and traineeships
Student exchange agreements
Scholarships
International MSc programmes
Continuing and further education
PhD programme
Collaborations with upper secondary schools
Secretariat services for Curriculum Board
External examiners secretariat
Dispensations and credits
Educational statistics and analyses
New educational programmes
For programme and study-related questions, please feel free to contact us.

Organisation profile

Education
The Electronics Group puts special pride into linking theory and modelling to the experimental test & validation of results. Through this a highly innovative environment has been established, educating engineering students at BEng, BSc, MSc and PhD levels.

Research
Our expertise in solving energy efficiency related problems and presenting innovative solutions is what makes the Electronics Group an essential part of numerous research projects in collaboration with industry.
The Electronics Group is the most innovative group at the department with 13 out of 37 inventions since year 2000.

Organisation profile

Education
At DTU Electrical Engineering we educate engineers within electrical engineering technologies as well as biomedical engineering.
We offer studies at BEng-, BSc-, MSc- and PhD levels. The department also participates in international master programmes.

Research
We conduct research within biomedical engineering, antenna and microwave technology, robot technology, power- and physical electronics, eletric technology, acoustic environment, audiology, and electro-acoustics.
A large part of our research is carried out in close interaction with industry and Research institutions in Denmark and abroad.

Organisation profile

Education
We offer a range of courses and programmes within manufacturing, product design, production technology, strategy, economics, management, organisational, sociotechnical design, entrepreneurship and sustainability.

Research
Our main research areas are innovation, product development, production management, sustainability, construction management and operations research.

Industrial collaboration
We emphasise the transfer of knowledge between industry and academia. Research co-operation can take many forms: industrial PhD projects; research consortiums; innovation contracts, and collaboration agreements.

Organisational unit: Department

Center for BioProcess Engineering
Department of Chemical and Biochemical Engineering
Organisation profile

The Center for BioProcess Engineering currently hosts and manages three larger research structures:

1. **The Novozymes BioProcess Academy** was established in 2002 with substantial support from Novozymes A/S. Currently, 8 full-time, post-graduate students studying for the qualification of PhD as well as 4 MSc students are enrolled with the academy.

2. **The Research Consortium "Innovative BioProcess Technology"** was established in 2005 as a major research collaboration between Center for Biochemical Engineering – a cooperation between The Dept. of Chemical Engineering and BioCentrum, DTU – and the three major Danish biobased companies: Novozymes A/S, Danisco A/S, and Chr. Hansen A/S. The programme will run for at least 5 years and educate at least 5 PhD, 1 postdoc, and 10 MSc candidates.

3. **Center for Biological Production of Dietary Fibres and Prebiotics.** Started Jan. 1. 2007 via a grant from Danish Council for Strategic Research (Programme Committee on Food and Health) and with main support from Danisco A/S. The Centre will educate minimum 9 PhDs and 4 postdocs.
