Critical evaluation and comparison of fluid distribution systems for industrial scale expanded bed adsorption chromatography columns
Research output: Contribution to journal › Journal article – Annual report year: 2008 › Research › peer-review

Fractionation of whey proteins with high-capacity superparamagnetic ion-exchangers
Research output: Contribution to journal › Journal article – Annual report year: 2004 › Research › peer-review

Superparamagnetic adsorbents for high-gradient magnetic fishing of lectins out of legume extracts
Research output: Contribution to journal › Journal article – Annual report year: 2004 › Research › peer-review

Superparamagnetic cation-exchange adsorbents for bioproduct recovery from crude process liquors by high-gradient magnetic fishing
Research output: Contribution to journal › Journal article – Annual report year: 2004 › Research › peer-review

Efficient inclusion body processing using chemical extraction and high gradient magnetic fishing
Research output: Contribution to journal › Journal article – Annual report year: 2003 › Research › peer-review

Functionalisation of Non-Porous Superparamagnetic Protein Adsorbents and their Application In High Gradient Magnetic Fishing

A new fluid distribution system for scale-flexible expanded bed adsorption
Research output: Contribution to journal › Journal article – Annual report year: 2002 › Research › peer-review
