Evidence logics with relational evidence
We introduce a family of logics for reasoning about relational evidence: evidence that involves an ordering of states in terms of their relative plausibility. We provide sound and complete axiomatizations for the logics. We also present several evidential actions and prove soundness and completeness for the associated dynamic logics.

General information
State: Published
Organisations: Department of Applied Mathematics and Computer Science, Algorithms and Logic, University of Amsterdam
Authors: Baltag, A. (Ekstern), Occhipinti, A. (Intern)
Pages: 17-32
Publication date: 2017
Main Research Area: Technical/natural sciences
