Research outputs:

The role of outer membrane proteins and lipopolysaccharides for the sensitivity of Escherichia coli to antimicrobial peptides
Ebbensgaard, A. E., Møller Aarestrup, F. & Bech Hansen, E. 7 Sep 2018 In : Frontiers in Microbiology. 9, 13 p., 2153
Research output: Research - peer-review › Journal article – Annual report year: 2018

Dissection of the antimicrobial and hemolytic activity of Cap18: Generation of Cap18 derivatives with enhanced specificity
Research output: Research - peer-review › Journal article – Annual report year: 2018

Antimicrobial peptide CAP18 and its effect on Yersinia ruckeri infections in rainbow trout Oncorhynchus mykiss (Walbaum): comparing administration by injection and oral routes
Research output: Research - peer-review › Journal article – Annual report year: 2016

Comparative Evaluation of the Antimicrobial Activity of Different Antimicrobial Peptides against a Range of Pathogenic Bacteria
Research output: Research - peer-review › Journal article – Annual report year: 2015

Activation and polar sequestration of PopA, a c-di-GMP effector protein involved in Caulobacter crescentus cell cycle control
Research output: Research - peer-review › Journal article – Annual report year: 2014

Chemoinformatics-assisted development of new anti-biofilm compounds
Research output: Research - peer-review › Journal article – Annual report year: 2010
