Barth F. Smets - Research outputs - DTU Orbit (13/10/2018)

Application of the NDHA model to describe N₂O dynamics in activated sludge mixed culture biomass
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2018

Comammox Nitrospira are abundant ammonia oxidizers in diverse groundwater-fed rapid sand filter communities
Research output: Research - peer-review › Journal article – Annual report year: 2018

Comparative genomics sheds light on niche differentiation and the evolutionary history of comammox Nitrospira
Research output: Research - peer-review › Journal article – Annual report year: 2018

Corrigendum to *Decay Experiments of Effective N-Removing Microbial Communities in Sequencing Batch Reactors*
Lv, C., Ming, L., Zhong, S., Wang, J., Lei, W., Mutlu, A. G. & Smets, B. F. 2018 In : Journal of Chemistry. 2018
Research output: Research - peer-review › Comment/debate – Annual report year: 2018

Diagnostics, Monitoring and Mitigation of N₂O Emissions from Wastewater Treatment Operations – Outcomes of the LAGAS project
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2018

Does universal 16S rRNA gene amplicon sequencing of environmental communities provide an accurate description of nitrifying guilds?
Research output: Research - peer-review › Journal article – Annual report year: 2018

Estimating the Transfer Range of Plasmids Encoding Antimicrobial Resistance in a Wastewater Treatment Plant Microbial Community
Research output: Research - peer-review › Journal article – Annual report year: 2018

Evidence of co-metabolic bentazone transformation by methanotrophic enrichment from a groundwater-fed rapid sand filter
Research output: Research - peer-review › Journal article – Annual report year: 2018

Genomic and ecological variation in comammox Nitrospira populations
Research output: Research - peer-review › Poster – Annual report year: 2018

Metagenomic analysis to elucidate the metabolic potential of microbial communities in Danish waterworks
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2018

Model-based optimization biofilm based systems performing autotrophic nitrogen removal using the comprehensive NDHA model
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2018
Counter-diffusion biofilms have lower N₂O emissions than co-diffusion biofilms during simultaneous nitrification and denitrification: Insights from depth-profile analysis
Research output: Research - peer-review › Journal article – Annual report year: 2017

Density and distribution of nitrifying guilds in rapid sand filters for drinking water production: Dominance of Nitrospira spp.
Research output: Research - peer-review › Journal article – Annual report year: 2017

Diffusion and sorption of organic micropollutants in biofilms with varying thicknesses
Research output: Research - peer-review › Journal article – Annual report year: 2017

Discovery and description of complete ammonium oxidizers in groundwater-fed rapid sand filters
Research output: Research › Ph.D. thesis – Annual report year: 2017

Diversity, structure, and novel physiologies in microbial communities in rapid sand filters
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2017

Dramatic loss of comammox Nitrospira associated with long-term nitrite feeding
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2017

Dynamics of N₂O production pathways analyzed by ¹⁵N¹⁸O isotope labeling
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2017

Establishment and calibration of consensus process model for nitrous oxide dynamics in water quality engineering
Research output: Research › Ph.D. thesis – Annual report year: 2017

From biofilm ecology to reactors: a focused review
Research output: Research - peer-review › Journal article – Annual report year: 2017

Heterotrophs are key contributors to nitrous oxide production in mixed liquor under low C-to-N ratios during nitrification - batch experiments and modelling
Research output: Research - peer-review › Journal article – Annual report year: 2017

Intermittent Aeration Suppresses Nitrite-Oxidizing Bacteria in Membrane-Aerated Biofilms: A Model-Based Explanation
Research output: Research - peer-review › Journal article – Annual report year: 2017
Invasion in microbial communities: Role of community composition and assembly processes
Research output: Research › Ph.D. thesis – Annual report year: 2017

Invasion of nitrite oxidizer dominated communities: interactions between propagule pressure and community composition
Research output: Research › Conference abstract for conference – Annual report year: 2017

Low nitrous oxide production in intermittent-feed high performance nitritating reactors
Research output: Research › Conference abstract for conference – Annual report year: 2017

Low nitrous oxide production through nitrifier-denitrification in intermittent-feed high-rate nitritation reactors
Research output: Research › Peer review › Journal article – Annual report year: 2017

Membrane-aerated Nitrifying Biofilms: Continuous versus Intermittent Aeration
Research output: Research › Conference abstract for conference – Annual report year: 2017

Metal stressors consistently modulate bacterial conjugal plasmid uptake potential in a phylogenetically conserved manner
Research output: Research › Peer review › Journal article – Annual report year: 2016

Microbial biotechnologies for potable water production
Research output: Research › Peer review › Journal article – Annual report year: 2017

Moving bed biofilm reactors (MBBRs) for removal of pharmaceuticals in biological wastewater treatment
Research output: Research › Peer review › Poster – Annual report year: 2017

N2O and NO dynamics in AOB-enriched and mixed-culture biomass: experimental observations and model calibration
Research output: Research › Peer review › Poster – Annual report year: 2017

N2O and NO dynamics in AOB-enriched and mixed-culture biomass: Experimental Observations and Model Calibration
Research output: Research › Conference abstract for conference – Annual report year: 2017

Niche differentiation and evolution of comammox Nitrospira through a comparative genomics analysis
Research output: Research › Peer review › Conference abstract for conference – Annual report year: 2017

Niche partitioning within genus Nitrospira is affected by environmental copper concentration
Research output: Research › Peer review › Conference abstract for conference – Annual report year: 2017

Nitrogen recovery from wastewater to produce microbial protein using methane oxidizing bacteria
Research output: Research › Peer review › Conference abstract for conference – Annual report year: 2017
Nitrotoga is selected over Nitrospira in newly assembled biofilm communities from a tap water source community at increased nitrite loading
Research output: Research - peer-review › Journal article – Annual report year: 2017

Nitrous oxide Production in Membrane-aerated Nitrifying Biofilms: Experimentation and Modelling
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2017

N₂O emissions from a single-stage partial nitritation/anammox granule-based reactor – a model based assessment
Research output: Research - peer-review › Poster – Annual report year: 2017

Operational strategies for mitigation of nitrous oxide emissions from a phase isolated fullscale WWTP
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Pathways and Controls of N₂O Production in Nitritation-Anammox Biomass
Research output: Research - peer-review › Journal article – Annual report year: 2017

Plasmid host range (permisseveness) in comminities of activated sludge in wastewater treatment plant
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Plasmid host range (permisseveness) in microbial communities of activated sludge in wastewater treatment plant.
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2017

Removal of micropollutants in Moving Bed Biofilm reactors (MBBRs): Microbial-diversity-and-functional-relationships
Research output: Research › Ph.D. thesis – Annual report year: 2017

Removal of pharmaceuticals in Moving Bed Biofilm Reactors – The impact of design and operating conditions
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2017

Simple control rules for mitigating N₂O emissions in phase isolated fullscale WWTPs
Sustain Abstract L-16
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Simple control strategy for mitigating N₂O emissions in phase isolated full-scale WWTPs
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017
Sorption and diffusion of micropollutants on/in biofilms: experimental observations and a model-based interpretation
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2017

The competitive edge: competition and biofilm composition, an individual-based modelling approach
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2017

The Europe - China Water Innovation Balance – Findings from the PIANO project’s mapping
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Tracking and understanding AMR dynamics across European urban water systems
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2017

A conceptual framework for invasion in microbial communities
Research output: Research - peer-review › Journal article – Annual report year: 2016

A consilience model to describe N₂O production during biological N removal
Research output: Research - peer-review › Journal article – Annual report year: 2016

Assessing motility in environmental communities - a novel method
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2016

Biodiversity positively associates with biofilm thickness in Moving Bed Biofilm Reactors (MBBRs) – Implications on micropolllutant removal and nitrification
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Biofilm Thickness Influences Biodiversity in Nitrifying MBBRs-Implications on Micropollutant Removal
Research output: Research - peer-review › Journal article – Annual report year: 2016

Can we enhance the biotransformation of pharmaceutical micropollutants by controlling biofilm thickness in MBBR?
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2017

Challenges in microbial ecology: Building predictive understanding of community function and dynamics
De novo biofilm community assembly from tap water source communities favors Nitrotoga over Nitrospira under elevated nitrite surface loading
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Depth investigation of rapid sand filters for drinking water production reveals strong stratification in nitrification biokinetic behavior
Research output: Research - peer-review › Journal article – Annual report year: 2016

Does reactor staging influence microbial structure and functions in biofilm systems? The case of pre-denitrifying MBBRs
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Dynamics of N₂O production pathways in a full-scale activated sludge system analysed by ¹⁵N/¹⁸O dual isotope labelling
Ma, C., Jensen, M. M., Smets, B. F., Lavik, G. & Thamdrup, B. 2016 Microbial ecology and water engineering & biofilms specialist groups (MEWE2016). Copenhagen, Denmark : IWA, p. 82-83
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Ecological patterns, diversity and core taxa of microbial communities in groundwater-fed rapid gravity filters
Research output: Research - peer-review › Journal article – Annual report year: 2016

Ecological patterns of nitrifiers in the urban water cycle
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2016

Enhancing the removal of pharmaceuticals in biological wastewater treatment: Is MBBR the answer?
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Establishing drinking water biofilms with varying alpha-diversity?
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Evaluating robustness of a diesel-degrading bacterial consortium isolated from contaminated soil
Research output: Research - peer-review › Journal article – Annual report year: 2016

Harvesting microalgae using activated sludge can decrease polymer dosing and enhance methane production via co-digestion in a bacterial-microalgal process
Research output: Research - peer-review › Journal article – Annual report year: 2016

Identifying novel nitrifying bacteria in rapid gravity sand filters using stable isotope probing
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2016
Investigating comammox Nitrospira in rapid sand filters via metagenomics and single-cell genomics
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Linking nitrifiers diversity to the flux of their key resources
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Low-sludge age EBPR process for resource recovery – microbial and biochemical process characterization
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Low-sludge age EBPR process for resource recovery – microbial and biochemical process characterization
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Measuring community-wide conjugative plasmid permissiveness
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2016

Metagenomic analysis of rapid gravity sand filter microbial communities suggests novel physiology of Nitrospira spp
Research output: Research - peer-review › Journal article – Annual report year: 2016

Metagenomics and single-cell genomics reveal high abundance of comammox Nitrospira in a rapid gravity sand filter treating groundwater
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Microbes in biological processes for municipal landfill leachate treatment: Community, function and interaction
Research output: Research - peer-review › Journal article – Annual report year: 2016

Microbial and biochemical process characterization of a low-sludge age EBPR process for resource recovery
Research output: Research - peer-review › Poster – Annual report year: 2016

Microbial biodiversity enhances micropollutants biotransformation in Moving Bed Biofilm Reactors (MBBR) with controlled biofilm thickness
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Optimizing nitrification in biological rapid sand filters for drinking water production
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Sammenhæng mellem aktivitet af metanoksiderende bakterier, opformeret fra sandfiltre på danske vandværker, og nedbrydningen af pesticidet bentazon
Short-sludge age EBPR process – Microbial and biochemical process characterisation during reactor start-up and operation
Research output: Research - peer-review › Journal article – Annual report year: 2016

Sources and propagation of uncertainty in N2O model predictions
Research output: Research - peer-review › Poster – Annual report year: 2016

Spatial distribution of microbial community and N2O depth profiles in counter- and co- diffusion biofilms functioning simultaneously nitrification and denitrification
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Stable isotope probing and dynamic loading experiments provide insight into the ecophysiology of novel ammonia oxidizers in rapid gravity sand filters
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Structural and functional robustness of an environmental bacterial community degrading diesel fuel
Research output: Research - peer-review › Conference abstract in journal – Annual report year: 2017

Suppression of nitrite-oxidizing bacteria in intermittently aerated biofilm reactors: a model-based explanation
Ma, Y., Domingo Felez, C., Plósz, B. G. & Smets, B. F. 2016 Microbial ecology and water engineering & biofilms specialist groups (MEWE2016). Copenhagen, Denmark : IWA, p. 158-159
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

The formation dynamics of microbial aggregates
Research output: Research - peer-review › Poster – Annual report year: 2016

The impact of backwashing on nitrification in biological rapid sand filters under different ammonium loading conditions

Research output: Research › peer-review › Conference abstract in proceedings – Annual report year: 2013
Reply to Comment on "Modeling Nitrous Oxide Production during Biological Nitrogen Removal via Nitrification and Denitrification: Extensions to the General ASM Models"
Research output: Research - peer-review › Comment/debate – Annual report year: 2013

Stratification of nitrification activity in rapid sand filters for drinking water treatment
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2013

An operation protocol for facilitating start-up of single-stage autotrophic nitrogen removing reactors based on process stoichiometry
Research output: Research - peer-review › Article in proceedings – Annual report year: 2012

An operation protocol for facilitating start-up of single-stage autotrophic nitrogen removing reactors based on process stoichiometry
Research output: Research - peer-review › Article in proceedings – Annual report year: 2012

Architecture evolution of biomass aggregates in single stage nitritation/anammox reactors
Research output: Research - peer-review › Poster – Annual report year: 2012

Biological Removal of Manganese and Iron in Rapid Sand Filters
Research output: Research - peer-review › Paper – Annual report year: 2012

Calibration and validation of a model describing complete autotrophic nitrogen removal in granular sludge
Research output: Research - peer-review › Article in proceedings – Annual report year: 2012

Calibration and validation of model describing complete autotrophic nitrogen removal in granular sludge
Research output: Research - peer-review › Sound/Visual production (digital) – Annual report year: 2012

Effect of surface loading fluctuations in rapid sand-filters used to remove ammonium from drinking water
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Effect of surface loading fluctuations on ammonium removal during rapid sand filtration
Research output: Research - peer-review › Poster – Annual report year: 2012

Effect of the kinetics of ammonium and nitrite oxidation on nitritation success or failure for different biofilm reactor geometries
Research output: Research - peer-review › Journal article – Annual report year: 2012

Efficient Total Nitrogen Removal in an Ammonia Gas Biofilter through High-Rate OLAND
Research output: Research - peer-review › Journal article – Annual report year: 2012
Energibesparende biologisk proces til kvælstoffjernelse i spildevand
Research output: Research - peer-review › Journal article – Annual report year: 2012

Evaluation on the microbial interactions of anaerobic ammonium oxidizers and heterotrophs in Anammox biofilm
Research output: Research - peer-review › Journal article – Annual report year: 2012

Increased insight in microbial processes in rapid sandfilters in drinking water treatment (DW BIOFILTERS)
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2012

In-situ microbial activity in membrane-aerated biofilms for autotrophic nitrogen conversion
Research output: Research - peer-review › Poster – Annual report year: 2012

Isolation of 2-methyl-4-chlorophenoxyacetic acid degrading bacteria from groundwater sediments using a novel low substrate flux approach
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Microbial Abundance, Distribution and Diversity in Rapid Sand Filters
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Micro-scale spatial expansion of microbial cells and mobile genetic elements.
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Modeling the Performance of Biological Rapid Sand Filters Used to Remove Ammonium, Iron, and Manganese From Drinking Water
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Neutrophilic iron oxidizers adapted to highly oxic environments
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Neutrophilic Iron Oxidizing Bacteria: Occurrence and Relevance in Biological Drinking Water Treatment
Research output: Research - peer-review › Paper – Annual report year: 2012

Permissiveness of soil microbial communities toward receipt of mobile genetic elements
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Pseudomonad Swarming Motility Is Restricted to a Narrow Range of High Matric Water Potentials
Dechesne, A. & Smets, B. F. 2012 In : Applied and Environmental Microbiology. 78, 8, p. 2936-2940
Research output: Research - peer-review › Journal article – Annual report year: 2012
Recent trends in modelling and simulation of biological nutrient removal systems
Research output: Research - peer-review › Poster – Annual report year: 2012

Recent trends in modelling and simulation of nutrient removal systems
Research output: Research - peer-review › Book chapter – Annual report year: 2012

Redox stratified biofilms to support completely autotrophic nitrogen removal: Principles and results
Pellicer i Nàcher, C. & Smets, B. F. 2012
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Relating dynamic conditions to the performance of biological rapid sand filters used to remove ammonium, iron, and manganese from drinking water
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Sensitivity analysis of autotrophic N removal by a granule based bioreactor: Influence of mass transfer versus microbial kinetics
Research output: Research - peer-review › Journal article – Annual report year: 2012

The Role of Microbial Heterogeneity in Pesticide Degradation in Agricultural Soils
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Transcriptome Dynamics of Pseudomonas putida KT2440 under Water Stress
Research output: Research - peer-review › Journal article – Annual report year: 2012

An individual-based approach to explain plasmid invasion in bacterial populations
Research output: Research - peer-review › Journal article – Annual report year: 2011

Assessing the impact of physical and physiological factors on the oxygen mass transfer process in membrane-aerated biofilm reactors
Research output: Research - peer-review › Poster – Annual report year: 2011

Biological Nitrogen Removal from Domestic Wastewater
Ruscallada Beylier, M., Balaguer, M. D., Pellicer i Nàcher, C., Smets, B. F., Sun, S-P. & Wang, R-C. 2011
Research output: Research - peer-review › Book chapter – Annual report year: 2012

Cm-scale Heterogeneity In Degradation - Potential Impact on Leaching of MCPA through a Variably-Saturated Macroporous Clayey Till
Rosenbom, A. E., Johnsen, A. R., Aamand, J., Binning, P. J., Dechesne, A. & Smets, B. F. 2011
Research output: Research - peer-review › Poster – Annual report year: 2011

Design of microbial communities in membrane bioreactors: the next generation of environmental biotechnologies (EcoDesign-MBR)
Effects of PAH-Contaminated Soil on Rhizosphere Microbial Communities
Research output: Research - peer-review › Journal article – Annual report year: 2011

Framework for Construction of Multi-scale Models for Biological Wastewater Treatment Processes
Research output: Research › Poster – Annual report year: 2011

Growth dependence of conjugation explains limited plasmid invasion in biofilms: an individual-based modelling study
Research output: Research - peer-review › Journal article – Annual report year: 2011

iDynoMiCS: next-generation individual-based modelling of biofilms
Research output: Research - peer-review › Journal article – Annual report year: 2011

Isolation of herbicide-degrading bacteria from a groundwater aquifer using novel enrichment and isolation techniques
