Research outputs:

Hygrothermal assessment of north facing, cold attic spaces under the eaves with varying single sided passive ventilation strategies and infiltration scenarios, in a cool, temperate climate
Research output: Contribution to conference › Paper – Annual report year: 2018 › Research › peer-review

Projects:

Hygrothermal assessment of north facing, cold attic spaces under the eaves with varying structural roof scenarios
Project: Research

Symposium om Ventilationsforhold i koide skunkrum – Etape 2
Project: Research

modelAttic - an OpenModelica model to examine the hygrothermal conditions in a cold, north-facing attic space under the eaves
Project: Research

Mechanical Ventilation Solutions for Optimisation of Energy Efficiency an Indoor Environments in Danish Homes
Project: PhD

Ventilationsforhold i kolde tagrum som skunkrum og hanebåndslofter i konstruktioner med diffusionsåbne underlige – Etape 2.
Project: Research

Activities:

modelAttic - an OpenModelica model to examine the hygrothermal conditions in a cold, north-facing attic space under the eaves
Activity: Other
