A framework for medium-fidelity wake dynamics in moderately complex terrain
Larsen, G. C., van der Laan, P. & Ott, S. 2017
Publication: Research › Sound/Visual production (digital) – Annual report year: 2017

Loads in wind farms under non-neutral ABL stability conditions: A full-scale validation study of the DWM model.
Larsen, G. C., Larsen, T. J. & Hansen, K. S. 2017
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2017

Medium fidelity modelling of loads in wind farms under non-neutral ABL stability conditions – a full-scale validation study: Paper
Publication: Research - peer-review › Article in proceedings – Annual report year: 2017

Modeling Atmospheric Turbulence via Rapid Distortion Theory: Spectral Tensor of Velocity and Buoyancy
Publication: Research - peer-review › Journal article – Annual report year: 2017

Validation of the dynamic wake meander model with focus on tower loads: Paper
Publication: Research - peer-review › Article in proceedings – Annual report year: 2017

An experimental and numerical study of the atmospheric stability impact on wind turbine wakes
Publication: Research - peer-review › Journal article – Annual report year: 2015

Demonstration of a Basis for Tall Wind Turbine Design, EUDP Project Final Report
Publication: Research › Report – Annual report year: 2016

In search for a canonical design ABL stability class for wind farm turbines
Publication: Research - peer-review › Conference article – Annual report year: 2016

Investigation of wake interaction using full-scale lidar measurements and large eddy simulation: Investigation of wake interaction using full-scale lidar measurements and LES
Publication: Research - peer-review › Journal article – Annual report year: 2016

Validation of buoyancy driven spectral tensor model using HATS data
Publication: Research - peer-review › Conference article – Annual report year: 2016

Wake dynamics in offshore wind farms
Publication: Research › Ph.D. thesis – Annual report year: 2016

Wake flow characteristics at high wind speed
Publication: Research - peer-review › Article in proceedings – Annual report year: 2016

Wind turbine wake measurement in complex terrain
Publication: Research - peer-review › Conference article – Annual report year: 2016

Wind turbine wake models developed at the Technical University of Denmark: A review
Publication: Research - peer-review › Journal article – Annual report year: 2016

Comparative study of OMA applied to experimental and simulated data from an operating Vestas V27 wind turbine
Publication: Research - peer-review › Article in proceedings – Annual report year: 2015

Comparison of measured and simulated loads for the Siemens SWT 2.3 operating in wake conditions at the Lillgrund Wind Farm using HAWC2 and the dynamic wake meander model
Publication: Research › Poster – Annual report year: 2015

Comparison of measured and simulated loads for the Siemens SWT 2.3 operating in wake conditions at the Lillgrund Wind Farm using HAWC2 and the dynamic wake meander model
Publication: Research › Poster – Annual report year: 2015

Empirical modeling of single-wake advection and expansion using full-scale pulsed lidar-based measurements
Publication: Research - peer-review › Journal article – Annual report year: 2014

Engineering models for merging wakes in wind farm optimization applications
Publication: Research - peer-review › Conference article – Annual report year: 2015

Multiple Turbine Wakes
Machefaux, E., Larsen, G. C. & Mann, J. 2015 DTU Wind Energy. 204 p. (DTU Wind Energy PhD; No. 0043(EN)).
Publication: Research › Ph.D. thesis – Annual report year: 2015
Probabilistic Meteorological Characterization for Turbine Loads
Publication: Research - peer-review › Conference article – Annual report year: 2014

TOPFARM: Multi-fidelity optimization of wind farms
Publication: Research - peer-review › Journal article – Annual report year: 2013

A consistent turbulence formulation for the dynamic wake meandering model in the atmospheric boundary layer
Publication: Research › Ph.D. thesis – Annual report year: 2013

Application of OMA to an Operating Wind Turbine: now including Vibration Data from the Blades
Publication: Research - peer-review › Article in proceedings – Annual report year: 2013

Benchmarking of wind farm scale wake models in the EERA - DTOC project
Publication: Research - peer-review › Article in proceedings – Annual report year: 2013

Challenges in wind farm optimization
Larsen, G. C. 2013
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2013

Challenges in wind farm optimization
Larsen, G. C. 2013
Publication: Research › Sound/Visual production (digital) – Annual report year: 2013

Evaluation of the Wind Direction Uncertainty And Its Impact on Wake Modelling at the Horns Rev Offshore Wind Farm
Publication: Research › Sound/Visual production (digital) – Annual report year: 2013

Single Wake Meandering, Advection and Expansion - An analysis using an adapted Pulsed Lidar and CFD LES-ACL simulations
Publication: Research - peer-review › Article in proceedings – Annual report year: 2013

Single Wake Meandering, Advection and Expansion - An analysis using an adapted Pulsed Lidar and CFD LES-ACL simulations
Machefaux, E., Larsen, G. C., Troldborg, N. & Rettenmeier, A. 2013
Publication: Research › Sound/Visual production (digital) – Annual report year: 2013

The impact of atmospheric stability on wake losses
Publication: Research › Sound/Visual production (digital) – Annual report year: 2013
State of the art of wind farm optimization
Publication: Research - peer-review › Poster – Annual report year: 2012

Wind farm production estimates
Publication: Research - peer-review › Article in proceedings – Annual report year: 2012

Advancements in Wind Energy Metrology – UPWIND 1A2.3
Publication: Research › Report – Annual report year: 2011

A quasi 3D computation of merging wakes using a boundary layer equation model approach
Aagaard Madsen, H., Larsen, G. C., Troldborg, N. & Larsen, T. J. 2011
Publication: Research › Poster – Annual report year: 2011

Determination of near wake characteristics behind a wind turbine
Publication: Research › Conference abstract in proceedings – Annual report year: 2011

Evaluation of the Dynamic Wake Meander Model for Loads and Power Production at the Egmond aan Zee Wind Farm
Publication: Research › Conference abstract in proceedings – Annual report year: 2011

Light detection and ranging measurements of wake dynamics. Part II: two-dimensional scanning
Publication: Research - peer-review › Journal article – Annual report year: 2010

Load validation and comparison versus certification approaches of the Risø Dynamic Wake Meandering model implementation in GH Bladed
Publication: Research - peer-review › Article in proceedings – Annual report year: 2011

Modelling merging wakes with three different approaches
Publication: Research › Conference abstract in proceedings – Annual report year: 2011

Numerical simulations of wake interaction between two wind turbines at various inflow conditions
Publication: Research - peer-review › Journal article – Annual report year: 2010

Potential load reductions on megawatt turbines exposed to wakes using individual-pitch wake compensator and trailing-edge flaps
Publication: Research - peer-review › Journal article – Annual report year: 2010
Light detection and ranging measurements of wake dynamics Part I: One-dimensional Scanning
Publication: Research - peer-review › Journal article – Annual report year: 2010

TOPFARM - next generation design tool for optimization of wind farm topology and operation ... background, vision and challenges
Publication: Research - peer-review › Article in proceedings – Annual report year: 2010

Wind farm topology optimization including costs associated with structural loading
Publication: Research - peer-review › Article in proceedings – Annual report year: 2010

A quasi 3D computation of multiple wakes using a boundary layer equation BLE model
Publication: Research › Conference abstract in proceedings – Annual report year: 2009

A simple stationary semi-analytical wake model
Larsen, G. C. 2009 Risø National Laboratory for Sustainable Energy, Technical University of Denmark. 22 p. (Denmark. Forskningscenter Risoe. Risoe-R; No. 1713(EN)).
Publication: Research › Report – Annual report year: 2009

A tailored eddy viscosity closure consistent with the Dynamic Wake Meandering philosophy
Publication: Research › Conference abstract in proceedings – Annual report year: 2009

Development and calibration of an engineering model for simulation of wake velocity deficits
Aagaard Madsen, H., Larsen, G. C. & Larsen, T. J. 2009
Publication: Research › Conference abstract in proceedings – Annual report year: 2009

Do wind farms influence large scale turbulence?
Publication: Research › Conference abstract in proceedings – Annual report year: 2009

LiDAR measurements of full scale wind turbine wake characteristics
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2009

LiDAR Measurements of Full-scale Wind Turbine Wake Characteristics
Hansen, K. S., Larsen, G. C., Mann, J. & Enevoldsen, K. 2009
Publication: Research › Paper – Annual report year: 2009

Numerical Simulations of Wake Interaction between Two Wind Turbines at Various Inflow Conditions
Publication: Research › Conference abstract in proceedings – Annual report year: 2009

Gas Explosion Characterization, Wave Propagation: (Half-Scale Experiments)
Publication: Research › Report – Annual report year: 1987

Egenfrekvensberegning af Alternegy’s 7,5 m vinge
Publication: Research › Report – Annual report year: 1986

Egenfrekvensberegning af LM’s 8,5 m vinge
Publication: Research › Report – Annual report year: 1986

Elastic-Plastic Fracture Mechanics Analysis of a CT-Specimen - a Two-Dimensional Approach
Publication: Research › Report – Annual report year: 1986

Numerisk modellering af vindmøllevinger
Publication: Research › Report – Annual report year: 1986
Blast Wave Propagation and the Influence of Obstacles
Publication: Research › Article in proceedings – Annual report year: 1985

Gas Explosion Characterization, Wave Propagation: Small-Scale Experiments
Publication: Research - peer-review › Report – Annual report year: 1985

Gas Explosion Characterization, Wave Propagation (Half-Scale Experiments)
Roed, J., Andersen, S. I. S. & Larsen, G. C. 1985 157 p. (E U R; No. 9676(v.2)).
Publication: Research › Report – Annual report year: 1985

Projects:

Large scale atmospheric stuctures in space-time over flat terrain
15/11/2017 → 14/11/2020
Project: PhD

Inflow Characterization based on Remote Sensing using Pitot Tubes
01/02/2015 → 31/01/2018
Project: PhD

Wind Farm Layout Optimization in Complex Terrain
01/04/2014 → 31/12/2017
Project

Uncertainty Quantification of Wind Farm Flow Models
15/12/2013 → 23/03/2017
Project: PhD

PhD scholarship in Turbulent Atmospheric Flow with Relevance for Wind Energy
01/03/2013 → 29/09/2016
Project: PhD

Assessment of extreme design loads for modern wind turbines using the probabilistic approach
Abdallah, I., Natarajan, A., Sørensen, J. D., Larsen, G. C., Manuel, L. & Riziotis, V. A.
01/05/2012 → 24/08/2015
Project: PhD

Multiple Turbine Wakes
01/11/2011 → 24/08/2015
Project: PhD

The impact of non-neutral atmosphere on offshore wind turbines
de Mare, M. T., Mann, J., Larsen, G. C., Veldkamp, D., Berg, J., Bossanyi, E. A. & George, W. K.
15/03/2011 → 24/09/2015
Project: PhD
Wind Farm
Larsen, G. C., Troldborg, N. & Larsen, T. J.
01/02/2011 → 31/12/2014
Project

Nysted 2, Wakes
Larsen, G. C., Pedersen, M. M., Aagaard Madsen, H. & Larsen, T. J.
01/06/2010 → 30/06/2014
Project

ComWind (Flowcenter) AED
Sørensen, N. N., Troldborg, N., Réthoré, P., Bechmann, A., Zahle, F., Larsen, G. C. & Sørensen, J. N.
01/01/2010 → 31/12/2016
Project

Dynamic wake model for load calculations of wind turbines
Keck, R., Aagaard Madsen, H., Larsen, G. C., Hansen, M. O. L., Madsen, J. I. & Riziotis, V. A.
01/11/2009 → 27/09/2013
Project: PhD

Integrated design of wind power systems
01/02/2009 → 18/06/2012
Project: PhD
