Research outputs:

Deriving Environmental Life Cycle Inventory Factors for Land Application of Garden Waste Products Under Northern European Conditions
Research output: Research - peer-review › Journal article – Annual report year: 2019

Life cycle assessment of sewage sludge management options including long-term impacts after land application
Research output: Research - peer-review › Journal article – Annual report year: 2018

Estimation of long-term environmental inventory factors associated with land application of sewage sludge
Research output: Research - peer-review › Journal article – Annual report year: 2016

Long-Term Emission Factors for Land Application of Treated Organic Municipal Waste
Research output: Research - peer-review › Journal article – Annual report year: 2015

A comprehensive substance flow analysis of a municipal wastewater and sludge treatment plant
Research output: Research - peer-review › Journal article – Annual report year: 2015

Effects of sewage sludge stabilization on fertilizer value and greenhouse gas emissions after soil application
Research output: Research - peer-review › Journal article – Annual report year: 2015

Influence of data collection schemes on the Life Cycle Assessment of a municipal wastewater treatment plant.
Research output: Research - peer-review › Journal article – Annual report year: 2014

Life cycle assessment of sewage sludge treatment and its use on land
Research output: Research › Ph.D. thesis – Annual report year: 2014

Plant-integrated measurement of greenhouse gas emissions from a municipal wastewater treatment plant
Research output: Research - peer-review › Journal article – Annual report year: 2014

The Role of Time Dependency in Life Cycle Assessment of Landfills – Accounting for Sinks and Releases
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014

Life cycle assessment of sewage sludge management: A review
Research output: Research - peer-review › Journal article – Annual report year: 2013

Development of substance flow based Life Cycle Assessment tool for sewage sludge treatment and disposal
Research output: Research - peer-review › Conference abstract for conference – Annual report year: 2012

Projects:

LCA model for sewage sludge - an EASEWASTE extension
Project: PhD
