Publications:

**Microbial electrolytic disinfection process for highly efficient Escherichia coli inactivation**
Publication: Research - peer-review › Journal article – Annual report year: 2018

**Acclimation to extremely high ammonia levels in continuous biomethanation process and the associated microbial community dynamics**
Publication: Research - peer-review › Journal article – Annual report year: 2018

**Amino acids production focusing on fermentation technologies – A review**
Publication: Research - peer-review › Review – Annual report year: 2018

**A novel process for volatile fatty acids production from syngas by integrating with mesophilic alkaline fermentation of waste activated sludge**
Publication: Research - peer-review › Journal article – Annual report year: 2018

**A proposed mechanism for the ammonia-LCFA synergetic co-inhibition effect on anaerobic digestion process**
Publication: Research - peer-review › Journal article – Annual report year: 2018

**Bio-Electro-Fenton process for the degradation of Non-Steroidal Anti-Inflammatory Drugs in wastewater**
Publication: Research - peer-review › Journal article – Annual report year: 2018

**Biogas and its opportunities—A review**
Publication: Research - peer-review › Review – Annual report year: 2018

**Biogas upgrading and utilization: Current status and perspectives**
Publication: Research - peer-review › Review – Annual report year: 2018

**Co-digestion and model simulations of source separated municipal organic waste with cattle manure under batch and continuously stirred tank reactors**
Publication: Research - peer-review › Journal article – Annual report year: 2018

**Converting mesophilic upflow sludge blanket (UASB) reactors to thermophilic by applying axenic methanogenic culture bioaugmentation**
Publication: Research - peer-review › Journal article – Annual report year: 2018

**Current as an indicator of ammonia concentration during wastewater treatment in an integrated microbial electrolysis cell - Nitrification system**
Publication: Research - peer-review › Journal article – Annual report year: 2018
Deciphering the microbial ecology in biogas reactors for optimizing the anaerobic digestion process
Publication: Research › Ph.D. thesis – Annual report year: 2018

Effect of different ammonia sources on aceticlastic and hydrogenotrophic methanogens
Publication: Research - peer-review › Journal article – Annual report year: 2018

Electricity generation and microbial communities in microbial fuel cell powered by macroalgal biomass
Publication: Research - peer-review › Journal article – Annual report year: 2018

Evaluation of microalgae production coupled with wastewater treatment
Publication: Research - peer-review › Journal article – Annual report year: 2018

Hybrid biogas upgrading in a two-stage thermophilic reactor
Publication: Research - peer-review › Journal article – Annual report year: 2018

Hydrogen-Fueled Microbial Pathways in Biogas Upgrading Systems Revealed by Genome-Centric Metagenomics
Publication: Research - peer-review › Journal article – Annual report year: 2018

Integrated production of cellulosic bioethanol and succinic acid from rapeseed straw after dilute-acid pretreatment
Publication: Research - peer-review › Journal article – Annual report year: 2018

Life cycle assessment of different strategies for energy and nutrient recovery from source sorted organic fraction of household waste
Publication: Research - peer-review › Journal article – Annual report year: 2018

Metagenomic binning reveals the functional roles of core abundant microorganisms in twelve full-scale biogas plants
Publication: Research - peer-review › Journal article – Annual report year: 2018

Microalgal process-monitoring based on high-selectivity spectroscopy tools: status and future perspectives
Publication: Research - peer-review › Review – Annual report year: 2018

Microbial electrochemical separation of CO₂ for biogas upgrading
Publication: Research - peer-review › Journal article – Annual report year: 2018

Microbial fuel cell-based biosensor for toxic carbon monoxide monitoring
Publication: Research - peer-review › Journal article – Annual report year: 2018

Nutrient recovery from industrial wastewater as single cell protein by a co-culture of green microalgae and methanotrophs
Publication: Research - peer-review › Journal article – Annual report year: 2018

Performance and genome-centric metagenomics of thermophilic single and two-stage anaerobic digesters treating cheese wastes
Publication: Research - peer-review › Journal article – Annual report year: 2018

Process performance and modelling of anaerobic digestion using source-sorted organic household waste
Publication: Research - peer-review › Journal article – Annual report year: 2018

Research in organic waste as resources: How to implement circular bio-economy in the urban context?
Publication: Research › Sound/Visual production (digital) – Annual report year: 2018
Salinity-gradient energy driven microbial electrosynthesis of value-added chemicals from CO₂ reduction
Publication: Research - peer-review › Journal article – Annual report year: 2018

Simultaneous biogas upgrading and biochemicals production using anaerobic bacterial mixed cultures
Publication: Research - peer-review › Journal article – Annual report year: 2018

Sustainable bioenergy and biofuels innovation challenge
Publication: Research - peer-review › Report chapter – Annual report year: 2018

Taxonomy of anaerobic digestion microbiome reveals biases associated with the applied high throughput sequencing strategies
Publication: Research - peer-review › Journal article – Annual report year: 2018

TiO₂–AgCl Based Nanoparticles for Photocatalytic Production of Phenolic Compounds from Lignocellulosic Residues
Publication: Research - peer-review › Journal article – Annual report year: 2018

Two-year microbial adaptation during hydrogen-mediated biogas upgrading process in a serial reactor configuration
Publication: Research - peer-review › Journal article – Annual report year: 2018

Valorisation of Effluents from Anaerobic Digestion as Single Cell Protein – Focus on Safe Gas Supply
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2018

Acclimation of ammonia tolerant methanogenic consortia using different bioreactor types
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Acclimation to extremely high ammonia levels during continuous biomethanation process
Publication: Research - peer-review › Paper – Annual report year: 2017

Algal Biomass for Bioenergy and Bioproducts Production in Biorefinery Concepts
Publication: Research › Ph.D. thesis – Annual report year: 2017

Anaerobic granular sludge for simultaneous biomethanation of synthetic wastewater and CO with focus on the identification of CO-converting microorganisms
Publication: Research - peer-review › Journal article – Annual report year: 2017

A novel archaean species belonging to Methanoculleus genus identified via de-novo assembly and metagenomic binning process in biogas reactors
Publication: Research - peer-review › Journal article – Annual report year: 2017

An overview of electron acceptors in microbial fuel cells
Publication: Research - peer-review › Review – Annual report year: 2017

Antibiotic Resistance Genes and Correlations with Microbial Community and Metal Resistance Genes in Full-Scale Biogas Reactors As Revealed by Metagenomic Analysis
Publication: Research - peer-review › Journal article – Annual report year: 2017

A review on prospects and challenges of biological H₂S removal from biogas with focus on biotrickling filtration and microaerobic desulfurization
Publication: Research - peer-review › Review – Annual report year: 2017

A systematic methodology to extend the applicability of a bioconversion model for the simulation of various co-digestion scenarios
Publication: Research - peer-review › Journal article – Annual report year: 2017
Batch, fed-batch and CSTR reactors as cultivation systems to acclimate ammonia tolerant methanogenic consortia
Publication: Research - peer-review › Poster – Annual report year: 2017

Bioaugmentation with hydrolytic microbes to improve the anaerobic biodegradability of lignocellulosic agricultural residues
Publication: Research - peer-review › Journal article – Annual report year: 2017

Bioelectricity production and microbial communities in microbial fuel cell powered by macroalgal biomass
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Bioelectrochemical systems serve anaerobic digestion process for process monitoring and biogas upgrading
Publication: Research › Ph.D. thesis – Annual report year: 2017

Bio-electrolytic sensor for rapid monitoring of volatile fatty acids in anaerobic digestion process
Publication: Research - peer-review › Journal article – Annual report year: 2017

Biological caproate production by Clostridium kluyveri from ethanol and acetate as carbon sources
Publication: Research - peer-review › Journal article – Annual report year: 2017

Biological systems for simultaneous methanation of CO₂ and H₂ by anaerobic microorganisms
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Butanol fermentation of the brown seaweed Laminaria digitata by Clostridium beijerinckii DSM-6422
Publication: Research - peer-review › Journal article – Annual report year: 2017

Characterization of the planktonic microbiome in upflow anaerobic sludge blanket reactors during adaptation of mesophilic methanogenic granules to thermophilic operational conditions
Publication: Research - peer-review › Journal article – Annual report year: 2017

Co-cultivation of Green Microalgae and Methanotrophic Bacteria for Single Cell Protein Production from Wastewater
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

Comparison of Fenton, UV-Fenton and nano-Fe₃O₄ catalyzed UV-Fenton in degradation of phloroglucinol under neutral and alkaline conditions: Role of complexation of Fe³⁺ with hydroxyl group in phloroglucinol
Publication: Research - peer-review › Journal article – Annual report year: 2017

Detailing the start-up and microalgal growth performance of a full-scale photobioreactor operated with bioindustrial wastewater
Publication: Research - peer-review › Journal article – Annual report year: 2017

Different cultivation methods to acclimatise ammonia-tolerant methanogenic consortia
Publication: Research - peer-review › Journal article – Annual report year: 2017

Effect of micro-aeration and inoculum type on the biodegradation of lignocellulosic substrate
Publication: Research - peer-review › Journal article – Annual report year: 2017

Effect of nitrogen source and acclimatization on specific growth rates of microalgae determined by a high throughput in vivo microplate autofluorescence method
Publication: Research - peer-review › Poster – Annual report year: 2017

Efficient treatment of aniline containing wastewater in bipolar membrane microbial electrolysis cell-Fenton system
Publication: Research - peer-review › Journal article – Annual report year: 2017
Electricity generation and microbial community in response to short-term changes in stack connection of self-stacked submersible microbial fuel cell powered by glycerol
Publication: Research - peer-review › Journal article – Annual report year: 2017

Electrochemical monitoring of ammonia during anaerobic digestion
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2017

Enhancing biogas production from recalcitrant lignocellulosic residue
Publication: Research › Ph.D. thesis – Annual report year: 2017

Enriched ammonia-tolerant methanogenic cultures as bioaugmentation inocula in continuous biomethanation processes
Publication: Research - peer-review › Journal article – Annual report year: 2017

Ex-situ biogas upgrading and enhancement in different reactor systems
Publication: Research - peer-review › Journal article – Annual report year: 2017

High efficient ethanol and VFAs production from gas fermentation: effect of acetate, gas and inoculum microbial composition
Publication: Research - peer-review › Journal article – Annual report year: 2017

Hydrogen assisted biological biogas upgrading
Publication: Research › Ph.D. thesis – Annual report year: 2017

Improving the energy balance of grass-based anaerobic digestion through combined harvesting and pretreatment
Publication: Research - peer-review › Journal article – Annual report year: 2017

Insights on the activity of the anaerobic digestion microbiome by means of metatranscriptomic functional investigation
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

In-situ biogas upgrading process: modeling and simulations aspects
Publication: Research - peer-review › Journal article – Annual report year: 2017

Integrated electrochemical-biological process as an alternative mean for ammonia monitoring during anaerobic digestion of organic wastes
Publication: Research - peer-review › Journal article – Annual report year: 2017

Intermittent provision of H₂ and CO₂ in up-flow reactors for ex-situ biogas upgrading
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017

iTRAQ quantitative proteomic analysis reveals the pathways for methanation of propionate facilitated by magnetite
Publication: Research - peer-review › Journal article – Annual report year: 2017

Laminaria digitata as potential carbon source in heterotrophic microalgae cultivation for the production of fish feed supplement
Publication: Research - peer-review › Journal article – Annual report year: 2017

Life cycle assessment of castor-based biorefinery: a well to wheel LCA
Publication: Research - peer-review › Journal article – Annual report year: 2017

Macroalgae Laminaria digitata and Saccharina latissima as Potential Biomasses for Biogas and Total Phenolics Production: Focusing on Seasonal and Spatial Variations of the Algae
Mechanical pretreatment at harvesting increases the bioenergy output from marginal land grasses

Microalgae biorefinery symbiosis: screening, production, and process analytical technology

Microbial community changes in methanogenic granules during the transition from mesophilic to thermophilic conditions

Microbial community dynamics during a successful acclimation process to extremely high ammonia levels in continuous anaerobic digester

Microbial electrochemical sensor for online ammonia monitoring of waste streams

Microbial electrolytic capture, separation and regeneration of CO₂ for biogas upgrading

Microbial population dynamics in urban organic waste anaerobic co-digestion with mixed sludge during a change in feedstock composition and different hydraulic retention times

Novel bio-electro-Fenton technology for azo dye wastewater treatment using microbial reverse-electrodialysis electrolysis cell

Novel protocol for lutein extraction from microalga Chlorella vulgaris

Optimization of hydrogen dispersion in thermophilic up-flow reactors for ex situ biogas upgrading

Process performance and comparative metagenomic analysis during co-digestion of manure and lignocellulosic biomass for biogas production

Salinity-gradient energy driven microbial electrosynthesis of hydrogen peroxide

Seaweed as innovative feedstock for energy and feed – Evaluating the impacts through a Life Cycle Assessment

The impact of anode acclimation strategy on microbial electrolysis cell treating hydrogen fermentation effluent

TiO₂/UV based photocatalytic pretreatment of wheat straw for biogas production
Wirelessly powered submerged-light illuminated photobioreactors for efficient microalgae cultivation
Publication: Research - peer-review › Journal article – Annual report year: 2017

System and method to control h2o2 level in advanced oxidation processes
Publication: Research › Patent – Annual report year: 2016

Acclimation of continuous biomethanation process to extremely high ammonia levels
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2017

Alternate switching between MFC and MEC for H2O2 synthesis and residual removal in Bioelectro-Fenton system
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2016

Alternative co-digestion scenarios for efficient fixed-dome reactor biomethanation processes
Publication: Research - peer-review › Journal article – Annual report year: 2016

Ammonia inhibition on hydrogen enriched anaerobic digestion of manure under mesophilic and thermophilic conditions
Publication: Research - peer-review › Journal article – Annual report year: 2016

Ammonia - LCFA synergetic co-inhibition effect in manure-based continuous biomethanation process
Publication: Research - peer-review › Journal article – Annual report year: 2016

Anaerobic modeling for improving synergy and robustness of a manure co-digestion process
Publication: Research - peer-review › Journal article – Annual report year: 2017

An innovative process for biogas upgrading by the microbial electrolysis cell
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Bioflocculation of green microalgae using activated sludge and potential for biogas production
Publication: Research - peer-review › Poster – Annual report year: 2016

Bioremediation capacity, nutritional value and biorefining of macroalga Saccharina latissima
Publication: Research › Ph.D. thesis – Annual report year: 2016

Co-digestion of food and garden waste with mixed sludge from wastewater treatment in continuously stirred tank reactors
Publication: Research - peer-review › Journal article – Annual report year: 2016

Co-digestion of microalgae and activated sludge following a novel bioflocculation method
Publication: Research - peer-review › Poster – Annual report year: 2016

Comparative analysis of taxonomic, functional, and metabolic patterns of microbiomes from 14 full-scale biogas reactors by metagenomic sequencing and radioisotopic analysis
Publication: Research - peer-review › Journal article – Annual report year: 2016

Cultivation of microalgae in industrial wastewaters
Publication: Research › Ph.D. thesis – Annual report year: 2016

Deeper insight into the structure of the anaerobic digestion microbial community; the biogas microbiome database is expanded with 157 new genomes
Publication: Research - peer-review › Journal article – Annual report year: 2016

Dynamic bioconversion mathematical modelling and simulation of urban organic waste co-digestion in continuously stirred tank reactor
Dynamic functional characterization and phylogenetic changes due to Long Chain Fatty Acids pulses in biogas reactors

Evaluation of minerals and vitamins in the Danish cultivated sugar kelp

Extraction of alginate from Sargassum muticum: process optimization and study of its functional activities

Forward osmosis treatment of effluents from anaerobic digestion: correlation between membrane performance and biogas potential

Harvesting microalgae using activated sludge can decrease polymer dosing and enhance methane production via co-digestion in a bacterial-microalgal process

Improving methane production from digested manure biofibers by mechanical and thermal alkaline pretreatment

Improving the energy balance of grass-based anaerobic digestion through harvesting optimization

Innovative microbial electrochemical process for H₂O₂ synthesis and residual H₂O₂ removal for wastewater treatment

In-situ biogas upgrading in thermophilic granular UASB reactor: key factors affecting the hydrogen mass transfer rate

Integrated production of cellulosic bioethanol and succinic acid from industrial hemp in a biorefinery concept

Low-sludge age EBPR process for resource recovery – microbial and biochemical process characterization

Mesophilic and thermophilic alkaline fermentation of waste activated sludge for hydrogen production: Focusing on homoacetogenesis

Metagenomic analysis and functional characterization of the biogas microbiome using high throughput shotgun sequencing and a novel binning strategy

Methane Production and Kinetic Modeling for Co-digestion of Manure with Lignocellulosic Residues

Methane production from formate, acetate and H₂/CO₂; focusing on kinetics and microbial characterization
Microbial and biochemical process characterization of a low-sludge age EBPR process for resource recovery
Publication: Research - peer-review › Poster – Annual report year: 2016

Microbial electrochemical monitoring of volatile fatty acids during anaerobic digestion
Publication: Research - peer-review › Journal article – Annual report year: 2016

Microbial Electrochemical Systems and Technologies: It Is Time To Report the Capital Costs
Publication: Research › Comment/debate – Annual report year: 2016

Microbial electrosynthesis of hydrogen peroxide in microbial reverse-electrodialysis electrolysis cell
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2016

Monitoring of volatile fatty acids during anaerobic digestion using a microbial electrochemical sensor
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2016

Optimising the anaerobic co-digestion of urban organic waste using dynamic bioconversion mathematical modelling
Publication: Research - peer-review › Journal article – Annual report year: 2016

Optimization of biomethanation focusing on high ammonia loaded processes
Publication: Research › Ph.D. thesis – Annual report year: 2016

Recent developments on biofuels production from microalgae and macroalgae
Publication: Research - peer-review › Journal article – Annual report year: 2016

Taxonomy and functional roles of biogas microbiota binned from multiple metagenomes of anaerobic digestion systems
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2017

The microbiome of biogas reactors treating lignocellulosic substrates revealed different mechanisms for carbohydrates utilization
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2017

TiO2 assisted photo-oxidative pretreatment of wheat straw for biogas production
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Towards a standardization of biomethane potential tests
Publication: Research - peer-review › Journal article – Annual report year: 2016

Untangling the Effect of Fatty Acid Addition at Species Level Revealed Different Transcriptional Responses of the Biogas Microbial Community Members
Publication: Research - peer-review › Journal article – Annual report year: 2016

Using a combination of binning strategies and taxonomic approaches to unravel the anaerobic digestion microbiome
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Valorization of macroalga Saccharina latissima as novel feedstock for fermentation-based succinic acid production in a biorefinery approach and economic aspects
Publication: Research - peer-review › Journal article – Annual report year: 2016

Variation in biochemical composition of Saccharina latissima and Laminaria digitata along an estuarine salinity gradient in Inner Danish waters
Publication: Research - peer-review › Journal article – Annual report year: 2016
Recovery of ammonia and sulfate from waste streams and bioenergy production via bipolar bioelectrodialysis
Publication: Research - peer-review › Journal article – Annual report year: 2015

Alternate switching between microbial fuel cell and microbial electrolysis cell operation as a new method to control H$_2$O$_2$ level in Bioelectro-Fenton system
Publication: Research - peer-review › Journal article – Annual report year: 2015

Ammonia effect on hydrogenotrophic methanogens and syntrophic acetate oxidizing bacteria
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2015

Ammonia effect on hydrogenotrophic methanogens and syntrophic acetate oxidizing bacteria
Publication: Research - peer-review › Journal article – Annual report year: 2015

Ammonia effect on hydrogenotrophic methanogens and syntrophic acetate oxidizing bacteria
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2015

Ammonia effect on hydrogenotrophic methanogens and syntrophic acetate oxidizing bacteria
Publication: Research - peer-review › Poster – Annual report year: 2015

Ammonia tolerant enriched methanogenic cultures as bioaugmentation inocula to alleviate ammonia inhibition in continuous anaerobic reactors
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2015

Ammonia tolerant enriched methanogenic cultures as bioaugmentation inocula to alleviate ammonia inhibition in continuous anaerobic reactors
Publication: Research - peer-review › Poster – Annual report year: 2015

Anaerobic co-digestion of agricultural by-products with manure, for enhanced biogas production
Publication: Research - peer-review › Journal article – Annual report year: 2015

Anaerobic Mono- and Co-digestion of Mechanically Pretreated Meadow Grass for Biogas Production
Publication: Research - peer-review › Journal article – Annual report year: 2015

Application of comminution machines to enhance the anaerobic biodegradability of ensiled meadow grass
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2015

Bioelectrochemical recovery of waste-derived volatile fatty acids and production of hydrogen and alkali
Publication: Research - peer-review › Journal article – Annual report year: 2015

Biogas production from ensiled meadow grass; effect of mechanical pretreatments and rapid determination of substrate biodegradability via physicochemical methods
Publication: Research - peer-review › Journal article – Annual report year: 2015

Biogas upgrading by injection of hydrogen in a two-stage Continuous Stirred-Tank Reactor system
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Biogas Upgrading via Hydrogenotrophic Methanogenesis in Two-Stage Continuous Stirred Tank Reactors at Mesophilic and Thermophilic Conditions
Publication: Research - peer-review › Journal article – Annual report year: 2015

Bioremediation Potential of Sugarkelp, Saccharina Latissima, Cultivated in a Commercial Off-Shore Integrated Multi-Trophic Aquaculture
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2015

Characterization of nutrient removal and microalgal biomass production on an industrial waste-stream by application of the deceleration-stat technique
Co-Digestion of Food Waste and Garden Waste With WTTP Mixed Sludge in CSTR

Combined anaerobic digestion of green waste with wastewater treatment plant mixed sludge in continuous stirred tank reactor (CSTR)

Commercial cultivation and bioremediation potential of sugar kelp, Saccharina latissima, in Danish waters

Comparison of mixotrophic to cyclic autotrophic/heterotrophic growth strategies to optimize productivity of Chlorella sorokiniana

Counteracting ammonia inhibition during anaerobic digestion by recovery using submersible microbial desalination cell

Counteracting foaming caused by lipids or proteins in biogas reactors using rapeseed oil or oleic acid as antifoaming agents

Economically Viable Components from Jerusalem Artichoke (Helianthus tuberosus L.) in a Biorefinery Concept

Effect of ammonia on hydrogenotrophic methanogens and syntrophic acetate oxidizing bacteria

Effect of nitrogen source and acclimatization on specific growth rates of microalgae determined by a high-throughput in vivo microplate autofluorescence method

Effect of pulse and continuous addition of oleate on microbial communities involved in anaerobic digestion process

Effects of Benzalkonium Chloride, Proxel LV, P3 Hypochloran, Triton X-100 and DOWFAX 63N10 on anaerobic digestion processes

Effects of triclosan, diclofenac, and nonylphenol on mesophilic and thermophilic methanogenic activity and on the methanogenic communities

Ethanol production from steam exploded rapeseed straw and the process simulation using artificial neural networks

Evaluation of the Danish cultivated sugarkelp as possible future source of ingredients such as minerals and pigments

High performance of nanoscaled Fe$_2$O$_3$ catalyzing UV-Fenton under neutral condition with a low stoichiometry of H$_2$O$_2$: Kinetic study and mechanism
Hydrogen mediated biogas upgrading in a two-stage mesophilic reactor
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2015

Innovative bioelectrochemical-anaerobic-digestion coupled system for ammonia recovery and biomethane production from ammonia-rich residues
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2015

Innovative bioelectrochemical-anaerobic-digestion integrated system for ammonia recovery and bioenergy production from ammonia-rich residues
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2015

Laminaria digitata as a potential carbon source for succinic acid and bioenergy production in a biorefinery perspective
Publication: Research - peer-review › Journal article – Annual report year: 2015

Lipids and Composition of Fatty Acids of Saccharina latissima Cultivated Year-round in Integrated Multi-trophic Aquaculture
Publication: Research - peer-review › Journal article – Annual report year: 2015

Macroalgae Laminaria digitata as potential carbon source in heterotrophic Chlorella protothekoides cultivation: an innovative biorefinery concept
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2015

Mechanical Pretreatment to Increase the Bioenergy Yield for Full-scale Biogas Plants
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2015

Metagenomic analysis on thermophilic biogas reactors fed with high load of Long Chain Fatty Acids (LCFA)
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2015

Microbial diversity and dynamicity of biogas reactors due to radical changes of feedstock composition
Publication: Research - peer-review › Journal article – Annual report year: 2015

Microbial dynamics in anaerobic digestion (AD) reactors with sodium oleate in the substrate
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2015

Microbial electrochemical monitoring of volatile fatty acids during anaerobic digestion
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2016

New steady-state microbial community compositions and process performances in biogas reactors induced by temperature disturbances
Publication: Research - peer-review › Journal article – Annual report year: 2015

Salinity-Gradient Energy Driven Microbial Electrosynthesis of Hydrogen Peroxide from Oxygen Reduction
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2015

Seasonal Amino Acid Profile and Nutritional Value of Saccharina Latissima in a Commercial IMTA System
Publication: Research › Conference abstract for conference – Annual report year: 2015

Seasonal variations in the amino acid profile and protein nutritional value of Saccharina latissima cultivated in a commercial IMTA system
Publication: Research - peer-review › Conference article – Annual report year: 2015
Seaweed potentials – evaluation of year-round biomass composition of commercial cultivated sugarkelp- results from project KOMBI
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2016

Solutions for Foaming Problems in Biogas Reactors Using Natural Oils or Fatty Acids as Defoamers
Publication: Research - peer-review › Conference article – Annual report year: 2015

Submersible microbial desalination cell for simultaneous ammonia recovery and electricity production from anaerobic reactors containing high levels of ammonia
Publication: Research - peer-review › Journal article – Annual report year: 2015

The biodegradability of a feedstock is determining the optimal C/N ratios in anaerobic digestion
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2015

Thermochemical pretreatments for enhancing succinic acid production from industrial hemp (Cannabis sativa L.)
Publication: Research - peer-review › Journal article – Annual report year: 2015

Unconventional biomasses as feedstocks for production of biofuels and succinic acid in a biorefinery concept
Publication: Research › Ph.D. thesis – Annual report year: 2015

15 ud af 16 biogasanlæg oplever problemer med skum
Publication: Communication › Journal article – Annual report year: 2015

A bio-electrochemical system for removing inhibitors of anaerobic digestion processes from anaerobic reactors
Publication: Research › Patent – Annual report year: 2014

A Green Micro-Algal Growth Model developed in the Activated Sludge Modeling Framework
Publication: Research - peer-review › Poster – Annual report year: 2014

An Activated Sludge Model for Mixed Green Microalgae (ASM-A): model identification and calibration
Publication: Research - peer-review › Paper – Annual report year: 2014

Anaerobic digestion foaming in full-scale biogas plants: A survey on causes and solutions
Publication: Research - peer-review › Journal article – Annual report year: 2014

Analysis of bacterial communities and bacterial pathogens in a biogas plant by the combination of ethidium monoazide, PCR and Ion Torrent sequencing
Publication: Research - peer-review › Journal article – Annual report year: 2014

An environmentally-friendly fluorescent method for quantification of lipid contents in yeast
Publication: Research - peer-review › Journal article – Annual report year: 2013

A new degassing membrane coupled upflow anaerobic sludge blanket (UASB) reactor to achieve in-situ biogas upgrading and recovery of dissolved CH4 from the anaerobic effluent
Publication: Research - peer-review › Journal article – Annual report year: 2014

An innovative bioelectrochemical-anaerobic digestion-coupled system for in-situ ammonia recovery and biogas enhancement: process performance and microbial ecology
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2015

A novel bioinformatic strategy to characterise microbial communities in biogas reactors
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014
Antifoaming effect of rapeseed oil and oleic acid in biogas reactors
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014

Bioaugmentation as a solution to increase methane production from an ammonia-rich substrate
Publication: Research - peer-review › Journal article – Annual report year: 2014

Bioaugmentation with a hydrogenotrophic methanogen: a powerful tool to overcome ammonia inhibition of anaerobic digestion process
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014

Bioelectrode-based approach for enhancing nitrate and nitrite removal and electricity generation from eutrophic lakes
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2014

Changes in the microbial profile of biogas reactors due to variations in the feedstock composition
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014

Comparative analysis of the microbial diversity in liquid and foaming layer in biogas reactors
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014

Comparative microbial analysis before and after foaming incidents in biogas reactors
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014

Comparison of VFA titration procedures used for monitoring the biogas process
Publication: Research - peer-review › Journal article – Annual report year: 2014

Danish Biomethanation Technologies for Novel Substrates Evaluation in Remote Rural Areas of India
Publication: Research - peer-review › Poster – Annual report year: 2014

Effective harvesting of the microalgae Chlorella protothecoides via bioflocculation with cationic starch.
Publication: Research - peer-review › Journal article – Annual report year: 2014

Effect of mechanical pre-treatment methods on the anaerobic digestibility and structure change of meadow grass for biogas production
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014

Effect of pH and H$_2$O$_2$ dosage on catechol oxidation in nano-Fe$_3$O$_4$ catalyzing UV-Fenton and identification of reactive oxygen species
Publication: Research - peer-review › Journal article – Annual report year: 2014

Ethanol production from industrial hemp: effect of combined dilute acid/steam pretreatment and economic aspects
Publication: Research - peer-review › Journal article – Annual report year: 2014

Publication: Research - peer-review › Report – Annual report year: 2014

Foam suppression in overloaded manure-based biogas reactors using antifoaming agents
Publication: Research - peer-review › Journal article – Annual report year: 2014

Integrated multi-trophic aquaculture (combined production of fish, mussels and seaweed)
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014
Metagenomic analysis of foaming in biogas reactors
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014

Methods for upgrading of a fuel gas and succinic acid production
Publication: Research › Patent – Annual report year: 2014

Microbial analysis in biogas reactors suffering by foaming incidents

Microbial diversity and dynamicity of biogas reactors fed with different substrates
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014

Microbial electrolysis cells turning to be versatile technology: recent advances and future challenges
Publication: Research - peer-review › Journal article – Annual report year: 2014

Microplate-based method for high-throughput screening of microalgae growth potential
Publication: Research - peer-review › Journal article – Annual report year: 2014

Modelling and assessment of the storage of nutrients in a mixed green microalgal culture
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2014

Nanomodification of the electrodes in microbial fuel cell: impact of nanoparticle density on electricity production and microbial community
Publication: Research - peer-review › Journal article – Annual report year: 2014

Optimization of extraction process of crude alginate from Sargassum muticum by response surface methodology
Publication: Research - peer-review › Poster – Annual report year: 2014

Photomicrobial fuel cell (PFC) for simultaneous organic carbon, nutrients removal and energy production
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2014

Potential of Jerusalem artichoke (Helianthus tuberosus L.) as a biorefinery crop
Publication: Research - peer-review › Journal article – Annual report year: 2014

Removal of organic pollutants in tannery wastewater from wet-blue fur processing by integrated Anoxic/Oxic (A/O) and Fenton: Process optimization
Publication: Research - peer-review › Journal article – Annual report year: 2014

Succinic acid production by fermentation of Jerusalem artichoke tuber hydrolysate with Actinobacillus succinogenes 130Z
Publication: Research - peer-review › Journal article – Annual report year: 2014

The dominant acetate degradation pathway/methanogenic composition in full-scale anaerobic digesters operating under different ammonia levels
Publication: Research - peer-review › Journal article – Annual report year: 2013

The Effect Of Light On Mixed Green Micro-Algal Growth: Experimental Assessment And Modelling
Publication: Research - peer-review › Poster – Annual report year: 2014

Utilization of CO₂ fixating bacterium Actinobacillus succinogenes 130Z for simultaneous biogas upgrading and bio-succinic acid production
Publication: Research - peer-review › Journal article – Annual report year: 2014
A Mixed Green Micro-Algal Model (MAMO) – Model Identification And Calibration Using Synthetic Medium And Nutrient Rich Carbon Depleted Wastewater
Publication: Research - peer-review › Paper – Annual report year: 2013

Anaerobic digestion foaming in Danish full-scale biogas plants: a survey on causes and solutions
Publication: Research › Sound/Visual production (digital) – Annual report year: 2013

Anaerobic digestion for simultaneous sewage sludge treatment and CO biomethanation: process performance and microbial ecology
Publication: Research - peer-review › Journal article – Annual report year: 2013

A new method for in situ nitrate removal from groundwater using submerged microbial desalination-denitrification cell (SMDDC)
Publication: Research - peer-review › Journal article – Annual report year: 2013

A novel and quick method to avoid H2O2 interference on COD measurement in Fenton system by Na2SO3 reduction and O2 oxidation.
Publication: Research - peer-review › Journal article – Annual report year: 2013

Antifoaming effect of chemical compounds in manure biogas reactors
Publication: Research - peer-review › Journal article – Annual report year: 2013

Bioaugmentation of an acetate-oxidising anaerobic consortium in up-flow sludge blanket reactor subjected to high ammonia loads
Publication: Research - peer-review › Conference abstract for conference – Annual report year: 2013

Bioaugmentation with an acetate-oxidising consortium as a tool to tackle ammonia inhibition of anaerobic digestion
Publication: Research - peer-review › Journal article – Annual report year: 2013

Bioethanol Production by Carbohydrate-Enriched Biomass of Arthrospira (Spirulina) platensis
Publication: Research - peer-review › Journal article – Annual report year: 2013

Carbohydrate-enriched cyanobacterial biomass as feedstock for bio-methane production through anaerobic digestion
Publication: Research - peer-review › Journal article – Annual report year: 2013

Co-digestion of manure and whey for in situ biogas upgrading by the addition of H2: process performance and microbial insights
Publication: Research - peer-review › Journal article – Annual report year: 2012

Publication: Research - peer-review › Journal article – Annual report year: 2013

Development and evaluation of a fast screening method of microalgal performance using microplates
Publication: Research - peer-review › Poster – Annual report year: 2013

Development of an algal wastewater treatment concept, based on the selection of microalgal strains with optimal bioextraction characteristics
Publication: Research - peer-review › Poster – Annual report year: 2013

Effect of ammonium and acetate on methanogenic pathway and methanogenic community composition
Publication: Research - peer-review › Journal article – Annual report year: 2013
Effect of organic loading rate and feedstock composition on foaming in manure-based biogas reactors
Publication: Research - peer-review › Journal article – Annual report year: 2013

Effects of hydrothermal pre-treatments on Giant reed (Arundo donax) methane yield
Publication: Research - peer-review › Journal article – Annual report year: 2013

Ethanol production from glucose and xylose by immobilized Thermoanaerobacter pentosaceus at 70 °C in an up-flow anaerobic sludge blanket (UASB) reactor
Publication: Research - peer-review › Journal article – Annual report year: 2013

Extreme thermophilic ethanol production from rapeseed straw: using the newly isolated Thermoanaerobacter pentosaceus and combining it with Saccharomyces cerevisiae in a two-step process

Biorefinery for sustainable biofuel production from energy crops; conversion of lignocellulose to bioethanol, biohydrogen and biomethane
Publication: Research - peer-review › Article in proceedings – Annual report year: 2007

Effect of post-treatments on biodegradability and methane recovery from fibres separated from thermophilically digested cow manure
Publication: Research - peer-review › Poster – Annual report year: 2007

Effect of temperature and anodic medium on power generation in microbial fuel cells (MFCs)
Publication: Research - peer-review › Poster – Annual report year: 2007

Enrichment and adaptation of extreme-thermophilic (70°C) H2 producing bacteria to organic household solid waste by repeated batch cultivations
Publication: Research - peer-review › Article in proceedings – Annual report year: 2007

Genetablering af biogasprocessen
Publication: Communication › Journal article – Annual report year: 2007

High-rate hydrogen production in up-flow anaerobic sludge blanket (UASB) using immobilized thermoanaerobacterium thermosaccharolyticum strain PSU-2 with treated methanogenic granules
Publication: Research - peer-review › Poster – Annual report year: 2007

Homoacetogenesis as the alternative pathway for H2 sink during thermophilic anaerobic degradation of butyrate under suppressed methanogenesis
Publication: Communication › Journal article – Annual report year: 2007

Monitoring and control of the biogas process based on propionate concentration using online VFA measurement
Publication: Research - peer-review › Article in proceedings – Annual report year: 2007

Optimization of biogas production by co-digesting whey with diluted poultry manure
Publication: Research - peer-review › Journal article – Annual report year: 2007

Optimization of biogas production from manure: Final project report EFP-04
Publication: Research › Report – Annual report year: 2007

Optimization of biogas production from olive-oil mill wastewater, by codigesting with diluted poultry-manure
Publication: Research - peer-review › Journal article – Annual report year: 2007

Re-establishing the biogas process
Publication: Research - peer-review › Journal article – Annual report year: 2007
Removal of residual organic matter, phosphates and ammonium from thermophilically digested pig manure
Publication: Research - peer-review › Article in proceedings – Annual report year: 2007

The development of biogas in Sweden and Denmark
Publication: Research - peer-review › Poster – Annual report year: 2007

Online monitoring and control of the biogas process
Publication: Research › Ph.D. thesis – Annual report year: 2006

Acetate oxidation is the dominant methanogenic pathway from acetate in the absence of Methanosaetaceae
Publication: Research - peer-review › Journal article – Annual report year: 2006

Biohydrogen production in granular up-flow anaerobic sludge blanket (UASB) reactors with mixed cultures under hyperthermophilic temperature (70 degree C)
Publication: Research - peer-review › Journal article – Annual report year: 2006

Enhanced biogas recovery by applying post-digestion in large-scale centralized biogas plants
Publication: Research - peer-review › Journal article – Annual report year: 2006

Evaluation of different lab-scale configurations for pig manure treatment (anaerobic codigestion, removal of organic matter and nutrients): A sustainable solution for pig manure treatment: Environmental compliance with the Integrated Pollution Prevention and Control directive (PIGMAN)
Publication: Research › Report – Annual report year: 2006

Publication: Research › Report – Annual report year: 2006

H2/CO2-aetogenesis pathway in anaerobic butyrate degradation with digested manure as inoculum at 55 degree C
Publication: Research › Conference abstract in proceedings – Annual report year: 2006

Hydrogen and methane production from household solid waste in the two-stage fermentation process
Publication: Research - peer-review › Journal article – Annual report year: 2006

Identifiability study of the proteins degradation model, based on ADM1, using simultaneous batch experiments
Publication: Research - peer-review › Journal article – Annual report year: 2006

Lessons learnt from 15 years of ICA in anaerobic digesters
Publication: Research - peer-review › Journal article – Annual report year: 2006

Operational strategies for thermophilic anaerobic digestion of organic fraction of municipal solid waste in continuously stirred tank reactors
Publication: Research - peer-review › Journal article – Annual report year: 2006

Optimering af biogasprocessen
Publication: Communication › Journal article – Annual report year: 2006

Stabilitet og udrådningseffektivitet for danske biogasanlæg
Publication: Research › Report – Annual report year: 2006
Strict anaerobic hyperthermophilic hydrogen producing culture enriched from digested household waste
Publication: Research - peer-review › Conference abstract in proceedings – Annual report year: 2006

Thermophilic anaerobic digestion of source-sorted organic fraction of household municipal solid waste: start-up procedure for continuously stirred tank reactor
Publication: Research - peer-review › Journal article – Annual report year: 2006

Anaerobic degradation of solid material: Importance of initiation centers for methanogenesis, mixing intensity, and 2D distributed model
Publication: Research - peer-review › Journal article – Annual report year: 2005

Anaerobic degradation of urban waste
Publication: Research › Article in proceedings – Annual report year: 2005

Biogasreaktorer i serie kan give op til 15 procent mere gas
Publication: Communication › Journal article – Annual report year: 2005

Development of new ecotoxicity tests adapted to organic wastes to be recycled in agriculture
Publication: Research - peer-review › Poster – Annual report year: 2005

Effect of operating conditions and reactor configuration on efficiency of full-scale biogas plants
Publication: Research - peer-review › Conference article – Annual report year: 2005

Effects of process stability on anaerobic biodegradation of LAS in UASB reactors
Publication: Research - peer-review › Journal article – Annual report year: 2005

Hydrogen and methane production from household solid waste in the two-stage fermentation process
Publication: Research - peer-review › Poster – Annual report year: 2005

Identifiability study of the proteins degradation model, based on ADM1, using simultaneous batch experiments
