Publications:

Hvordan undervandsdroner og robotter kan hjælpe med at monitere det arktiske marine miljø
Publication: Research › Journal article – Annual report year: 2017

Greenland ice sheet melt area from MODIS (2000-2014)
Publication: Research - peer-review › Journal article – Annual report year: 2015

Katabatic winds and piteraq storms: Observations from the Greenland ice sheet
Publication: Research - peer-review › Journal article – Annual report year: 2014

Darkening of the Greenland ice sheet due to the melt-albedo feedback observed at PROMICE weather stations
Publication: Research - peer-review › Journal article – Annual report year: 2013

Ablation observations for 2008-2011 from the Programme for Monitoring of the Greenland Ice Sheet (PROMICE)
Publication: Research - peer-review › Journal article – Annual report year: 2012

En ny strategi for Arktis
Publication: Communication › Newspaper article – Annual report year: 2011

Indlandsisen smelter og så stiger havet
Publication: Communication › Newspaper article – Annual report year: 2011

Programme for Monitoring of the Greenland Ice Sheet (PROMICE): first temperature and ablation record
Publication: Research - peer-review › Journal article – Annual report year: 2011

Klimaforandringer, natur, mennesker og samfund
Publication: Research › Book chapter – Annual report year: 2006

Numerical modelling of phytoplankton biomass in coastal waters
Publication: Research - peer-review › Journal article – Annual report year: 2005

Når havet stiger, – nyt klima – nyt liv? Rapport fra to scenarieværksteder afholdt i februar 2004
Publication: Research › Report – Annual report year: 2004

Material transport from the nearshore to the basinal environment in the southern Baltic Sea: I. Processes and mass estimates
Publication: Research - peer-review › Journal article – Annual report year: 2002
Projects:

Analysis of protected areas in the North Sea and the Central Baltic (Beskyttede områder) (39425)
