Research outputs:

Perinatal exposure to mixtures of anti-androgenic chemicals causes proliferative lesions in rat prostate
Research output: Research - peer-review › Journal article – Annual report year: 2015

Effects of perinatal ethinyl estradiol exposure in male and female Wistar rats
Research output: Research - peer-review › Journal article – Annual report year: 2013

Predictive value of cell assays for developmental toxicity and embryotoxicity of conazole fungicides.
Research output: Research - peer-review › Journal article – Annual report year: 2013

Differential effects of environmental chemicals and food contaminants on adipogenesis, biomarker release and PPARγ activation
Research output: Research - peer-review › Journal article – Annual report year: 2012

QSAR Model for Androgen Receptor Antagonism - Data from CHO Cell Reporter Gene Assays
Research output: Research - peer-review › Journal article – Annual report year: 2012

Differential effects of environmental chemicals and food contaminants on adipocyte differentiation, biomarker release, and PPARα/γ activation
Research output: Research - peer-review › Conference article – Annual report year: 2011
