Research outputs:

Advanced Liposomal Oxaliplatin Drug Delivery – Evaluation of Therapeutic Mechanisms and Synergism with Cancer Immunotherapy
Petersen, L. R. 2017 DTU Nanotech. 162 p.
Research output: Research › Ph.D. thesis – Annual report year: 2018

Projects:

Developing a novel method using nanoparticles to expand cancer-specific T-cells in vitro
Weller, S., Andresen, T. L. & Petersen, L. R.
15/11/2018 → 14/11/2021
Project: PhD

Optimizing solid cancer treatment with local immuno-gel injection with immunostimulatory drugs
Brus, A., Andresen, T. L., Petersen, L. R. & Agger, R.
01/11/2018 → 31/10/2021
Project: PhD

Development of drug delivery systems for treatment of atherosclerosis
Petersen, L. R., Andresen, T. L., Hansen, A. E., Bekiaris, V., Boesch, A., Christensen, D., Boesch, A. & Christensen, D.
Institut stipendie (DTU)
15/12/2014 → 15/08/2018
Project: PhD
