Interplay between daily rhythmic serum-mediated bacterial killing activity and immune defence factors in rainbow trout (Oncorhynchus mykiss)
Lazado, C. C., Gesto, M., Madsen, L. & Jokumsen, A. 2018 In : Fish and Shellfish Immunology. 72, p. 418-425
Publication: Research - peer-review › Journal article – Annual report year: 2018

Short-term exposure to repeated chasing stress does not induce habituation in Senegalese sole, Solea senegalensis
Publication: Research - peer-review › Journal article – Annual report year: 2018

Crosstalk between innate immunity and circadian rhythm: Do fish immune defences have a sense of time?
Publication: Research › Poster – Annual report year: 2017

Effects of repeated acute stress in Senegalese sole Solea senegalensis. Can this species habituate to reiterated handling stress?
Publication: Research › Conference abstract for conference – Annual report year: 2017

Emergence time and skin melanin spot patterns do not correlate with growth performance, social competitive ability or stress response in farmed rainbow trout
Gesto, M., Skov, P. V. & Jokumsen, A. 2017 In : Frontiers in Neuroscience. 11, 319
Publication: Research - peer-review › Journal article – Annual report year: 2017

Physiological roles of tryptophan in teleosts: current knowledge and perspectives for future studies
Publication: Research - peer-review › Journal article – Annual report year: 2017
A simple melatonin treatment protocol attenuates the response to acute stress in the sole Solea senegalensis
Publication: Research - peer-review › Journal article – Annual report year: 2015

Characterization of melatonin synthesis in the gastrointestinal tract of rainbow trout (Oncorhynchus mykiss): distribution, relation with serotonin, daily rhythms and photoperiod regulation
Publication: Research - peer-review › Journal article – Annual report year: 2016

First feeding behavior: A potential tool to select robust trout for organic aquaculture
Gesto, M. 2016 In : ICROFS news.
Publication: Research › Journal article – Annual report year: 2016

Stress-resilience differences related to emergence time in farmed rainbow trout
Gesto, M. & Jokumsen, A. 2016
Publication: Research › Conference abstract for conference – Annual report year: 2016

Stress-resilience differences related to emergence time in rainbow trout
Gesto, M. & Jokumsen, A. 2016
Publication: Research › Conference abstract for conference – Annual report year: 2016

Welfare, Health and Individuality in Farmed FISH: The WINFISH project
Publication: Research › Conference abstract for conference – Annual report year: 2016

Chronic effects of clofibric acid in zebrafish (Danio rerio): A multigenerational study
Publication: Research - peer-review › Journal article – Annual report year: 2015

Effects of tributyltin and other retinoid receptor agonists in reproductive-related endpoints in the Zebrafish (Danio rerio)
Publication: Research - peer-review › Journal article – Annual report year: 2015

Estrés en peces: respuesta fisiológica y sus implicaciones en el cultivo de salmonídos
Publication: Research › Journal article – Annual report year: 2016

Gradation of the Stress Response in Rainbow Trout Exposed to Stressors of Different Severity: The Role of Brain Serotonergic and Dopaminergic Systems
Publication: Research - peer-review › Journal article – Annual report year: 2015

Is gill cortisol concentration a good acute stress indicator in fish? A study in rainbow trout and zebrafish
Publication: Research - peer-review › Journal article – Annual report year: 2015
Retinoid level dynamics during gonad recycling in the limpet Patella vulgata
Publication: Research - peer-review › Journal article – Annual report year: 2015

Arginine vasotocin treatment induces a stress response and exerts a potent anorexigenic effect in rainbow trout, oncorhynchus mykiss
Publication: Research - peer-review › Journal article – Annual report year: 2014

Environmental levels of the antidepressant venlafaxine impact the metabolic capacity of rainbow trout
Publication: Research - peer-review › Journal article – Annual report year: 2014

Gradation of the acute stress response in rainbow trout exposed to stressors of different intensity
Publication: Research › Conference abstract for conference – Annual report year: 2014

Insulin treatment modulates the response of hypothalamic fatty acid sensors in rainbow trout
Publication: Research › Conference abstract for conference – Annual report year: 2014

Is plasma cortisol response to stress in rainbow trout regulated by catecholamine-induced hyperglycemia?
Publication: Research - peer-review › Journal article – Annual report year: 2014

Metabolic response of rainbow trout Brockmann bodies to decreased circulating fatty acid levels
Publication: Research › Conference abstract for conference – Annual report year: 2014

Methionine and tryptophan differentially regulate the European seabass Dicentrarchus labrax inflammatory response
Publication: Research › Conference abstract for conference – Annual report year: 2014

Oral administration of melatonin counteracts several of the effects of chronic stress in rainbow trout
Publication: Research - peer-review › Journal article – Annual report year: 2014

Preliminary evidence on the presence and functioning of alternative glucosensor systems in rainbow trout hypothalamus
Publication: Research › Conference abstract for conference – Annual report year: 2014

Retinoid metabolism in invertebrates: When evolution meets endocrine disruption
Publication: Research - peer-review › Journal article – Annual report year: 2014

Short-term time course of liver metabolic response to acute handling stress in rainbow trout, Oncorhynchus mykiss
Stress affects the daily pattern of central neuropeptides involved in food intake regulation of rainbow trout

Stress inhibition of melatonin synthesis in the pineal organ of rainbow trout (Oncorhynchus mykiss) is mediated by cortisol

Stress response and changes of liver metabolism in rainbow trout depend on the stress duration

The antidepressant venlafaxine disrupts brain monoamine levels and neuroendocrine responses to stress in rainbow trout

Differences in retinoid levels and metabolism among gastropod lineages: Imposex-susceptible gastropods lack the ability to store retinoids in the form of retinyl esters.
Gesto, M., Castro, L. F. C. & Santos, M. M. 2013 In : Aquatic Toxicology. 142-143, p. 96-103

Melatonin partially minimizes the adverse stress effects in Senegalese sole (Solea senegalensis).

Physiological responses during thermal shock in pre-slaughter procedures in turbot
Hernández, J., Gesto, M., Conde-Sieira, M., López-Patiño, M. A., Libran-Perez, M., Cabaleiro, S. & Míguez, J. M. 2013

The dynamics of the response of brain serotonergic and dopaminergic systems to an acute stressor in rainbow trout

The response of brain serotonergic and dopaminergic systems to an acute stressor in rainbow trout: a time course study

Arginine vasotocin ia a potent anorexigenic factor in the trout

Glucose concentration influences ACTH-stimulated cortisol release by head kidney of rainbow trout
Mechanistic insight into the effect of Venlafaxine on cortisol stress axis activity in rainbow trout
Vijayan, M., Melnyk-Lamont, N., Best, C. & Gesto, M. 2012
Publication: Research › Conference abstract for conference – Annual report year: 2012

Melatonin synthesis in trout pineal organ is influenced by stress
Publication: Research › Conference abstract in journal – Annual report year: 2012

Region-specific effects of Venlafaxine on monoaminergic and stress-related systems in rainbow trout brain
Publication: Research › Conference abstract for conference – Annual report year: 2012

Retinol metabolism in the mollusk Osilinus lineatus indicates an ancient origin for retinyl ester storage capacity
Publication: Research - peer-review › Journal article – Annual report year: 2012

Tissue-specific distribution patterns of retinoids and didehydroretinoids in rainbow trout Oncorhynchus mykiss
Publication: Research - peer-review › Journal article – Annual report year: 2012

Changes in plasma melatonin levels and pineal organ melatonin synthesis following acclimation of rainbow trout (Oncorhynchus mykiss) to different water salinities
Publication: Research - peer-review › Journal article – Annual report year: 2011

Alterations in the brain monoaminergic neurotransmitters of rainbow trout related to naphthalene exposure at the beginning of vitellogenesis
Publication: Research - peer-review › Journal article – Annual report year: 2009

beta-Naphthoflavone and benzo(a)pyrene alter dopaminergic, noradrenergic, and serotonergic systems in brain and pituitary of rainbow trout (Oncorhynchus mykiss)
Gesto, M., Tintos, A., Soengas, J. L. & Miguez, J. M. 2009 In : Ecotoxicology and Environmental Safety. 72, 1, p. 191-198
Publication: Research - peer-review › Journal article – Annual report year: 2009

Effects of naphthalene, beta-naphthoflavone and benzo(a)pyrene on the diurnal and nocturnal indoleamine metabolism and melatonin content in the pineal organ of rainbow trout, Oncorhynchus mykiss
Publication: Research - peer-review › Journal article – Annual report year: 2009

Acute and prolonged stress responses of brain monoaminergic activity and plasma cortisol levels in rainbow trout are modified by PAHs (naphthalene, beta-naphthoflavone and benzo(a)pyrene) treatment
Gesto, M., Soengas, J. L. & Miguez, J. M. 2008 In : Aquatic Toxicology. 86, 3, p. 341-351
Publication: Research - peer-review › Journal article – Annual report year: 2008

beta-naphthoflavone and benzo(a)pyrene treatment affect liver intermediary metabolism and plasma cortisol levels in rainbow trout Oncorhynchus mykiss
Publication: Research - peer-review › Journal article – Annual report year: 2008
Effect of salinity changes on AVT and melatonin plasma levels and AVT receptor expression in different tissues of rainbow trout
Publication: Research › Poster – Annual report year: 2008

Immunolocalization of glucokinase in glucosensing tissues of rainbow trout
Publication: Research › Conference abstract for conference – Annual report year: 2008

Naphthalene treatment alters liver intermediary metabolism and levels of steroid hormones in plasma of rainbow trout (Oncorhynchus mykiss)
Publication: Research - peer-review › Journal article – Annual report year: 2007

Changes in V1-type receptor expression in several tissues of rainbow trout acclimated to different salinities
Publication: Research › Poster – Annual report year: 2006

Differential effects of naphthalene on brain neurotransmitters of rainbow trout at two different stages of vitellogenesis
Publication: Research › Poster – Annual report year: 2006

Effects of acute and prolonged naphthalene exposure on brain monoaminergic neurotransmitters in rainbow trout (Oncorhynchus mykiss)
Publication: Research - peer-review › Journal article – Annual report year: 2006

Interactive effects of naphthalene treatment and the onset of vitellogenesis on energy metabolism in liver and gonad, and plasma steroid hormones of rainbow trout Oncorhynchus mykiss
Publication: Research - peer-review › Journal article – Annual report year: 2006

Interactive effects of naphthalene treatment and vitellogenesis on energy metabolism and steroid hormones in rainbow trout
Publication: Research › Poster – Annual report year: 2006

Arginine vasotocin stimulates melatonin release from trout pineal organs in culture: Possible action mediated by V1-type receptor
Publication: Research › Conference abstract for conference – Annual report year: 2005

Effect of season on daily rhythms of several indoles and 5-methoxyindoles in the pineal organ of trouts exposed to natural conditions
Publication: Research › Conference abstract for conference – Annual report year: 2005

Effects of naphthalene exposure on melatonin production and indole metabolism in trout pineal gland
Publication: Research › Conference abstract for conference – Annual report year: 2005

Arginine vasotocin modulates the secretion of melatonin and other 5-methoxyindoles in the pineal organ of the rainbow trout: an in vitro study
Effect of in vivo administration of arginine vasotocin on indoleamines and 5-methoxyindoles in the pineal organ of rainbow trout

Growth hormone actions on carbohydrate metabolism and osmoregulatory capacity of rainbow trout

Projects:

Welfare, health and individuality in farmed fish (WIN-FISH) (39236)
Gesto, M. & Skov, P. V.
18/05/2015 → 17/05/2018
Project

New possibilities for growth and robustness in organic aquaculture (ROBUSTFISH) (39159)
01/04/2014 → 31/12/2017
Project

Enhancing the European aquaculture production by removing production bottlenecks of emerging species, producing new products and accessing new markets (DIVERSIFY) (39132)
Lund, I., Skov, P. V. & Gesto, M.
01/01/2014 → 01/01/2018
Project
