Research outputs:

Bladder wall biomechanics: A comprehensive study on fresh porcine urinary bladder
Research output: Research - peer-review › Journal article – Annual report year: 2018

Fabrication, characterization, and biocompatibility assessment of a novel elastomeric nanofibrous scaffold: A potential scaffold for soft tissue engineering
Research output: Research - peer-review › Journal article – Annual report year: 2018

Immobilization of silk fibroin on the surface of PCL nanofibrous scaffolds for tissue engineering applications
Research output: Research - peer-review › Journal article – Annual report year: 2018

The effects of concentration and heating-cooling rate on rheological properties of Plantago lanceolata seed mucilage
Research output: Research - peer-review › Journal article – Annual report year: 2018

Biomechanical study of porcine urinary bladder wall: matter of isotropy or anisotropy
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2017
