Thorvald Uhrskov Ullum - Research outputs - DTU Orbit (26/05/2019)

Investigation of Turbulence and Flow Structures in Electrostatic Precipitator

Swirling flow structures in electrostatic precipitator
Research output: Contribution to journal › Journal article – Annual report year: 2004 › Research › peer-review

Turbulence studies of negative corona ESP
Research output: Chapter in Book/Report/Conference proceeding › Article in proceedings – Annual report year: 2004 › Research › peer-review

EFP-2000 - Electrostatic Precipitation - Reduction of Emissions and Energy Consumption
Larsen, P. S., Ullum, T. U. & Özcan, O., 2002
Research output: Book/Report › Report – Annual report year: 2002 › Communication

Three-dimensional flow and turbulence structure in electrostatic precipitator
Research output: Chapter in Book/Report/Conference proceeding › Article in proceedings – Annual report year: 2002 › Research › peer-review

Modeling of a straw fired boiler
Research output: Chapter in Book/Report/Conference proceeding › Article in proceedings – Annual report year: 2000 › Research › peer-review
