Determination and assessment of critical material parameters for severely cracked alkali-silica reaction damaged concrete structures' function and load bearing capacity

Thomsen, H. C. B., PhD Student, Department of Civil Engineering
Hansen, K. K., Main Supervisor
Barbosa, R. A., Supervisor
Grelk, B., Supervisor
Larsen, E. S., Supervisor

Offentlig finansiering
01/05/2017 → 10/03/2021
Award relations: Determination and assessment of critical material parameters for severely cracked alkali-silica reaction damaged concrete structures' function and load bearing capacity
Project: PhD
