Fast-tracking the identification of safe and effective probiotic bacteria by in silico prediction of bacterial genomic features - DTU Orbit (02/12/2018)

Fast-tracking the identification of safe and effective probiotic bacteria by in silico prediction of bacterial genomic features
Tang Karlsen, S., PhD Student, Department of Bio and Health Informatics
Lund, O., Main Supervisor, Department of Bio and Health Informatics
Bælum, J., Supervisor, Department of Systems Biology
Henderson, G., Supervisor
Industrial PhD
01/08/2017 → 31/07/2020
Award relations: Fast-tracking the identification of safe and effective probiotic bacteria by in silico prediction of bacterial genomic features
Project: PhD
