Broadband terahertz polarization rotator based on a twisted parallel plate waveguide

A broadband polarization rotator for terahertz waves is developed by 3D printing. The device is based on a twisted parallel plate waveguide.

General information
State: Published
Organisations: Department of Photonics Engineering, Ultrafast Infrared and Terahertz Science, Center for Nanostructured Graphene, Technical University of Denmark
Contributors: Kristensen, T. B., Iwaszczuk, K., Jepsen, P. U.
Number of pages: 2
Pages: 1-2
Publication date: 2016

Host publication information
Title of host publication: Proceedings of 2016 41st International Conference on Infrared, Millimeter, and Terahertz waves
Publisher: IEEE
