Building a shared understanding of the skills and competences in order to respond to the current global technical challenges - DTU Orbit (25/01/2016)

Building a shared understanding of the skills and competences in order to respond to the current global technical challenges

A pan-European team, including the representatives from 45 European universities, is working on an EU supported project to firstly explore and then provide models for ways in which Higher Education Institutions of Europe in the Electrical and Information Engineering disciplines can respond to current challenges. This paper presents the objectives and actual results of the EU supported project which runs from October 2012 to November 2015, named SALEIE – Strategic Alignment of Electrical and Information Engineering in European Higher Education Institutions. We describe in this paper the preliminary results of the project's work packages WP3 (Global Challenges) and WP4 (Widening Participation and Student Support).

General information
State: Published
Organisations: Center for Bachelor of Engineering Studies, Afdelingen for El-teknologi, University of York, University of Maribor, Technical University of Iasi, Cracow University of Technology
Authors: Friesel, A. (Intern), Ward, A. (Ekstern), Welzer, T. (Ekstern), Poboroniuc, M. (Ekstern), Mrozek, Z. (Ekstern)
Keywords: (educational institutions, electrical engineering education, information technology, Engineering Profession, General Topics for Engineers, Best practices, competencies in engineering, computer engineering, Educational institutions, electrical engineering, Employment, Engineering education, Europe, European universities, global challenges, global technical challenges, higher education institutions, pan-European team, Robots, SALEIE, strategic alignment of electrical and information engineering)
Number of pages: 4
Pages: 676 - 679
Publication date: 2014

Host publication information
Title of host publication: 2014 IEEE Global Engineering Education Conference (EDUCON)
Publisher: IEEE
ISBN (Print): 9781479931910
Main Research Area: Technical/natural sciences
DOIs: 10.1109/EDUCON.2014.6826166
Source: Findit
Source-ID: 268102628
Publication: Research - peer-review › Article in proceedings – Annual report year: 2014
