Change detection in a series of Sentinel-1 SAR data - DTU Orbit (23/11/2018)

Change detection in a series of Sentinel-1 SAR data
Based on an omnibus likelihood ratio test statistic for the equality of several variance-covariance matrices following the complex Wishart distribution with an associated p-value and a factorization of this test statistic, change analysis in a time series of seven multilook, dual polarization Sentinel-1 SAR data in the covariance matrix representation (with diagonal elements only) is carried out. The omnibus test statistic and its factorization detect if and when change occurs.

General information
State: Published
Organisations: Department of Applied Mathematics and Computer Science, Image Analysis & Computer Graphics, National Space Institute, Microwaves and Remote Sensing, Research Center Jülich GmbH
Contributors: Nielsen, A. A., Conradsen, K., Skriver, H., Canty, M. J.
Number of pages: 3
Publication date: 2017

Host publication information
Title of host publication: 9th International Workshop on the Analysis of Multitemporal Remote Sensing Images (MultiTemp 2017)
Publisher: IEEE
ISBN (Electronic): 978-1-5386-3327-4
DOIs: 10.1109/Multi-Temp.2017.8035210
