Characterization of mu s-ms dynamics of proteins using a combined analysis of N-15 NMR relaxation and chemical shift: Conformational exchange in plastocyanin induced by histidine protonations - DTU Orbit (06/12/2018)

Characterization of mu s-ms dynamics of proteins using a combined analysis of N-15 NMR relaxation and chemical shift: Conformational exchange in plastocyanin induced by histidine protonations. / Hass, M. A. S.; Thuesen, Marianne Hallberg; Christensen, Hans Erik Mølager; Led, J. J.
Research output: Research - peer-review : Journal article – Annual report year: 2004
