Danish integrated antimicrobial in resistance monitoring and research program - DTU Orbit (05/03/2019)

**Danish integrated antimicrobial in resistance monitoring and research program**

Resistance to antimicrobial agents is an emerging problem worldwide. Awareness of the undesirable consequences of its widespread occurrence has led to the initiation of antimicrobial agent resistance monitoring programs in several countries. In 1995, Denmark was the first country to establish a systematic and continuous monitoring program of antimicrobial drug consumption and antimicrobial agent resistance in animals, food, and humans, the Danish Integrated Antimicrobial Resistance Monitoring and Research Program (DANMAP). Monitoring of antimicrobial drug resistance and a range of research activities related to DANMAP have contributed to restrictions or bans of use of several antimicrobial agents in food animals in Denmark and other European Union countries.

**General information**

State: Published
Organisations: Department of Microbiology, National Food Institute, Division of Microbiology and Risk Assessment, Administration and Service, Division of Poultry, Fish and Fur Animals, National Veterinary Institute, Communications and Management Secretariat
Pages: 1632-1639
Publication date: 2007
Peer-reviewed: Yes

**Publication information**

Journal: Emerging Infectious Diseases
Volume: 13
Issue number: 11
