Designing Context-Aware Cognitive Behavioral Therapy for Unipolar and Bipolar Disorders

This position paper presents our preliminary design of context-aware cognitive behavioral therapy for unipolar and bipolar disorders. We report on the background for this study and the methods applied in the ongoing design process. The paper ends by presenting and discussing different design options. We hope this will be useful input for further discussion at the workshop.

General information
State: Published
Organisations: Copenhagen Center for Health Technology, Department of Applied Mathematics and Computer Science, Embedded Systems Engineering, University of Copenhagen, IT University of Copenhagen
Contributors: Bardram, J. E., Frost, M., Tuxen, N., Faurholt-Jepsen, M., Kessing, L. V.
Number of pages: 9
Pages: 1162-1170
Publication date: 2016

Host publication information
Title of host publication: Proceedings of the 2016 ACM International Joint Conference on Pervasive and Ubiquitous Computing: Adjunct
Publisher: Association for Computing Machinery
ISBN (Print): 978-1-4503-4462-3
Keywords: Mental Health, Depression, Bipolar Disorder, Cognitive Behavioral Therapy, CBT, Context-Aware Intervention, Recommender System
DOIs: 10.1145/2968219.2968303
Research output: Research - peer-review > Article in proceedings – Annual report year: 2016
