Development of the compound layer during nitriding and nitrocarburising of iron and iron-carbon alloys - DTU Orbit (18/02/2019)

Development of the compound layer during nitriding and nitrocarburising of iron and iron-carbon alloys

General information
State: Published
Organisations: Department of Mechanical Engineering, Materials and Surface Engineering
Contributors: Somers, M. A. J.
Pages: 341-372
Publication date: 2015

Host publication information
Title of host publication: Thermochemical Surface Engineering of Steels
Publisher: Woodhead Publishing
Editors: Mittemeijer, E., Somers, M.
ISBN (Print): 9780857095923
ISBN (Electronic): 9780857096524
DOIs:
10.1533/9780857096524.3.341
Research output: Research - peer-review; Book chapter – Annual report year: 2014
