Direct Measurement of Polarization Dependency of Mode Conversion in a Long Period Grating - DTU Orbit (04/05/2019)

Direct Measurement of Polarization Dependency of Mode Conversion in a Long Period Grating

A thermal induced long period grating mode converter with high bandwidth, and low loss is presented. Polarization dependency of the mode conversion is measured using spatial and spectral (S2) imaging and found to be low.

General information
Publication status: Published
Organisations: Department of Photonics Engineering, Fiber Optics, Devices and Non-linear Effects, Centre of Excellence for Silicon Photonics for Optical Communications
Contributors: Gruner-Nielsen, L., Mariam Mathew, N., Rottwitt, K.
Number of pages: 3
Publication date: 2019

Host publication information
Title of host publication: Optical Fiber Communication Conference 2019
Publisher: Optical Society of America
Article number: Th2A.15
ISBN (Print): 978-1-943580-53-8
DOIs:
10.1364/OFC.2019.Th2A.15

Bibliographical note
From the session: Poster Session II (Th2A)
