Drivers and barriers for implementation of environmental strategies in manufacturing companies - DTU Orbit (28/12/2018)

Drivers and barriers for implementation of environmental strategies in manufacturing companies
In order for environmental strategies to come into effect in industry practice, they need to be implemented and applied in daily business routines. Based on a dedicated comprehensive international survey in product developing and manufacturing companies, this paper identifies major current drivers for implementing product life cycle oriented environmental strategies but also barriers and obstacles that need to be addressed. On this basis it provides a number of recommendations for manufacturing companies as well as policy makers to consider for a successful implementation of strategic environmental goals in manufacturing industry.

General information
State: Published
Organisations: Department of Management Engineering, Quantitative Sustainability Assessment, Department of Mechanical Engineering, Engineering Design and Product Development
Contributors: Bey, N., Hauschild, M. Z., McAloone, T. C.
Pages: 43-46
Publication date: 2013
Peer-reviewed: Yes
