Enyne Metathesis Catalyzed by Ruthenium Carbene Complexes

Enyne metathesis combines an alkene and an alkyne into a 1,3-diene. The first enyne metathesis reaction catalyzed by a ruthenium carbene complex was reported in 1994. This review covers the advances in this transformation during the last eight years with particular emphasis on methodology development and synthetic applications.

General information
State: Published
Organisations: Department of Chemistry
Contributors: Poulsen, C. S., Madsen, R.
Pages: 1-18
Publication date: 2003
Peer-reviewed: Yes

Publication information
Journal: Synthesis
Issue number: 1
