Experiences from developing a new course in mechatronics - DTU Orbit (05/05/2019)

Experiences from developing a new course in mechatronics

Experiences from a new course in mechatronics at Technical University of Denmark are conveyed in this paper. The course is supposed to teach students enrolled in the bachelor degree in electrical engineering some fundamental knowledge about mechanics and to teach students enrolled in the bachelor degree in mechanical engineering fundamentals about electronics. Furthermore the course uses project work as a method to keep the students actively participating and in part have them teach each other the subjects. The general course plan is presented and the reasoning behind the course structure is discussed in the paper, together with a brief look at the student's reactions in form of data from the course evaluation.

General information
Publication status: Published
Organisations: Department of Electrical Engineering, Automation and Control, Department of Automation
Contributors: Hansen, S., Ravn, O.
Pages: 135-138
Publication date: 2015

Host publication information
Title of host publication: Proceedings of 16th International Conference on research and Education in Mechatronics
Publisher: IEEE
ISBN (Print): 978-3-945728-01-7
Keywords: Components, Circuits, Devices and Systems, Computing and Processing, Engineering Profession, General Topics for Engineers, Robotics and Control Systems, Signal Processing and Analysis, Education, Electrical engineering, Mechatronics, Proposals, Robot kinematics, Three-dimensional displays
Electronic versions:
rem2015.pdf
DOIs: 10.1109/REM.2015.7380383
