Experimental Investigation of the Evolution of Gaussian Quantum Discord in an Open System - DTU Orbit (10/12/2018)

Experimental Investigation of the Evolution of Gaussian Quantum Discord in an Open System

Gaussian quantum discord is a measure of quantum correlations in Gaussian systems. Using Gaussian discord, we quantify the quantum correlations of a bipartite entangled state and a separable two-mode mixture of coherent states. We experimentally analyze the effect of noise addition and dissipation on Gaussian discord and show that the former noise degrades the discord, while the latter noise for some states leads to an increase of the discord. In particular, we experimentally demonstrate the near death of discord by noisy evolution and its revival through dissipation.

General information
State: Published
Organisations: Department of Physics, Quantum Physics and Information Technology
Contributors: Madsen, L. S., Berni, A., Lassen, M., Andersen, U. L.
Pages: 030402
Publication date: 2012
Peer-reviewed: Yes

Publication information
Journal: Physical Review Letters
Volume: 109
Issue number: 3
