Flow characterization of aerated bubble column reactor using electrical resistance tomography and computational fluid dynamic methods - DTU Orbit (12/04/2019)

Flow characterization of aerated bubble column reactor using electrical resistance tomography and computational fluid dynamic methods. / Bach, Christian; Albæk, Mads O.; Krühne, Ulrich; Gernaey, Krist V.; Ein-Mozaffari, Farhad . 2017. Abstract from 10th World Congress of Chemical Engineering (WCCE10), Barcelona, Spain.

Research output: Contribution to conference › Conference abstract for conference – Annual report year: 2018 › Research › peer-review
