Influence of thermal effects induced by nonlinear absorption on four-wave mixing in silicon waveguides is investigated. A conversion bandwidth reduction up to 63% is observed in simulation due to the thermal effects.

General information
State: Published
Organisations: Department of Photonics Engineering, Nanophotonic Devices
Contributors: Pu, M., Chen, Y., Yvind, K.
Pages: 177-178
Publication date: 2014

Host publication information
Title of host publication: Proceedings of 2014 IEEE 11th International Conference on Group IV Photonics
Publisher: IEEE
ISBN (Print): 9781479922833
Keywords: Photonics and Electrooptics, Absorption, Bandwidth, Dispersion, Four-wave mixing, Nonlinear optics, Optical waveguides, Optical wavelength conversion, Silicon, Silicon photonics, Two-photon absorption, Wavelength conversion
DOIs: 10.1109/Group4.2014.6961977
