Investigating tumor perfusion by hyperpolarized (13) C MRI with comparison to conventional gadolinium contrast-enhanced MRI and pathology in orthotopic human GBM xenografts - DTU Orbit (01/01/2019)

Investigating tumor perfusion by hyperpolarized (13) C MRI with comparison to conventional gadolinium contrast-enhanced MRI and pathology in orthotopic human GBM xenografts: Correlation of 13C Perfusion Imaging and Gd-Enhanced Contrast MRI. / Park, Ilwoo; von Morze, Cornelius; Lupo, Janine M; Ardenkjær-Larsen, Jan Henrik; Kadambi, Achuta; Vigneron, Daniel B; Nelson, Sarah J.
