Koch-Fractal Yagi-Uda Antenna

A Yagi-Uda antenna constructed of three Koch fractal elements is presented. Simulated and measured characteristics of the antenna shows a half-power beam-width of 64° achieved with dimensions below a third of a wavelength. Furthermore, the Koch dipole and its size miniaturization capabilities are investigated.

General information
State: Published
Organisations: Electromagnetic Systems, Department of Electrical Engineering, Technical University of Denmark
Contributors: Teisbæk, H. B., Jakobsen, K. B.
Pages: 149-160
Publication date: 2009
Peer-reviewed: Yes

Publication information
Journal: Journal of Electromagnetic Waves and Applications
Volume: 23
Issue number: 2-3
ISSN (Print): 0920-5071
