Multi-core Fibers in Submarine Networks for High-Capacity Undersea Transmission Systems

Application of multi-core fibers in undersea networks for high-capacity submarine transmission systems is studied. It is demonstrated how different architectures of submerged branching unit affect network component counts in long-haul undersea transmission systems.

General information
State: Published
Organisations: Department of Photonics Engineering, High-Speed Optical Communication, Centre of Excellence for Silicon Photonics for Optical Communications
Contributors: Nooruzzaman, M., Morioka, T.
Number of pages: 3
Publication date: 2017

Host publication information
Title of host publication: Proceedings of Optical Fiber Communication Conference 2017
Publisher: Optical Society of America (OSA)
Article number: W4F.5
ISBN (Print): 978-1-943580-23-1
DOIs:
10.1364/OFC.2017.W4F.5

Bibliographical note
From the session: WDM and SDM Networking (W4F)
Research output: Research - peer-review › Article in proceedings – Annual report year: 2017
