PCR-based assay for the detection of Alternaria species and correlation with HPLC
determination of altenuene, alternariol and alternariol monomethyl ether production in
tomato products - DTU Orbit (29/12/2018)
Pavón Moreno, MÁ, Luna, A, de la Cruz, S, González, I, Martín, R & García, T 2012, 'PCR-based assay for the detection
of Alternaria species and correlation with HPLC determination of altenuene, alternariol and alternariol monomethyl ether
production in tomato products' *Food Control*, vol 25, no. 1, pp. 45-52. DOI: 10.1016/j.foodcont.2011.10.009
