Policies and Initiatives for Carbon Neutrality in Nordic - DTU Orbit (19/12/2018)

Policies and Initiatives for Carbon Neutrality in Nordic

Policies and initiatives promoting carbon neutrality in the Nordic heating and transport systems are presented. The focus within heating systems is the promotion of HPs (heat pumps) while the focus within transport systems is initiatives regarding EVs (electric vehicles). It is found that the conversion to HPs in the Nordic region relies on both private economic and national economic incentives. Initiatives toward carbon neutrality in the transport system are mostly concentrated on research, development and demonstration for deployment of a large number of EVs. All Nordic countries have plans for the future heating and transport systems with the ambition of realizing carbon neutrality.

General information
State: Published
Organisations: Department of Electrical Engineering, Center for Electric Power and Energy
Contributors: Wu, Q., Møller, J. G., Østergaard, J., Nielsen, A. H.
Pages: 1745-1753
Publication date: 2013
Peer-reviewed: Yes

Publication information
Journal: Journal of Energy and Power Engineering
Volume: 7
ISSN (Print): 1934-8975
Ratings:
