Solitary waves on nonlinear elastic rods. II.

In continuation of an earlier study of propagation of solitary waves on nonlinear elastic rods, numerical investigations of blowup, reflection, and fission at continuous and discontinuous variation of the cross section for the rod and reflection at the end of the rod are presented. The results are compared with predictions of conservation theorems for energy and momentum.

**General information**
- State: Published
- Organisations: Department of Informatics and Mathematical Modeling, Applied functional analysis, Department of Mathematics, Technical University of Denmark
- Contributors: Sørensen, M. P., Christiansen, P. L., Lomdahl, P. S., Skovgaard, O.
- Pages: 1718-1722
- Publication date: 1987
- Peer-reviewed: Yes
