The ESA Earth Observation Magnetic Mission Swarm carries high precision vector and scalar magnetometers. Careful analyses have revealed a smaller, Sun driven magnetic disturbance of the vector magnetometer. This disturbance have been imperically mapped and corrected since mid 2015. This work will show the recent developments in the modelling of this disturbance.

**General information**
State: Published
Organisations: National Space Institute, Geomagnetism, Measurement and Instrumentation Systems, Institut de Physique du Globe de Paris, ESRIN - ESA Centre for Earth Observation
Contributors: Tøffner-Clausen, L., Lesur, V., Brauer, P., Olsen, N., Finlay, C., Qamili, E.
Number of pages: 1
Publication date: 2016
Peer-reviewed: Yes
Event: Abstract from ESA Living Planet Symposium 2016, Prague, Czech Republic.
