The role of laboratory testing in the development of rotor aerodynamics (review) - DTU Orbit (30/12/2018)

The role of laboratory testing in the development of rotor aerodynamics (review)
The aim of the review is to assess the value of model experimental studies for the development of classical rotor aerodynamics as well as to describe the most significant recent results stimulated by intense development of wind power.

General information
State: Published
Organisations: Department of Wind Energy, Fluid Mechanics
Contributors: Okulov, V.
Number of pages: 20
Publication date: 2018
Peer-reviewed: Yes

Publication information
Journal: Thermophysics and Aeromechanics
Volume: 25
Issue number: 1
ISSN (Print): 0869-8643
Ratings:
