Tools and data services registry - DTU Orbit (14/03/2019)

Tools and data services registry: a community effort to document bioinformatics resources

Life sciences are yielding huge data sets that underpin scientific discoveries fundamental to improvement in human health, agriculture and the environment. In support of these discoveries, a plethora of databases and tools are deployed, in technically complex and diverse implementations, across a spectrum of scientific disciplines. The corpus of documentation of these resources is fragmented across the Web, with much redundancy, and has lacked a common standard of information. The outcome is that scientists must often struggle to find, understand, compare and use the best resources for the task at hand. Here we present a community-driven curation effort, supported by ELIXIR—the European infrastructure for biological information—that aspires to a comprehensive and consistent registry of information about bioinformatics resources. The sustainable upkeep of this Tools and Data Services Registry is assured by a curation effort driven by and tailored to local needs, and shared amongst a network of engaged partners. As of September 2015, the registry includes 1633 resources, with depositions from 91 individual registrations including 40 institutional providers and 51 individuals. With community support, the registry can become a standard for dissemination of information about bioinformatics resources: we welcome everyone to join us in this common endeavour. The registry is freely available at https://bio.tools.

General information

State: Published
Organisations: Department of Systems Biology, Center for Biological Sequence Analysis, Institut Pasteur, University of Copenhagen, University of Manchester, Palacký University Olomouc, European Bioinformatics Institute, Centre for Ecology and Hydrology, National Institute for Agronomic Research, University of Bologna, University of Rome Tor Vergata, Flanders Institute for Biotechnology, CRS4-Bioinformatics Laboratory, University of Milan - Bicocca, Swiss Institute of Bioinformatics, Bielefeld University, University of Freiburg, Technical University of Munich, French Institute of Bioinformatics, University of Ljubljana, Chinese University of Hong Kong, University of Padova, Bioinformatics Research Centre, Daresbury Laboratory, University of Lübeck, University of Tartu, Imperial College London, IRCCS AOU San Martino-IST, University of Southern Denmark, Wellcome Trust Centre for Human Genetics, Central European Institute of Technology, Fundación Centro Nacional de Investigaciones Cardiovasculares, University of Rome La Sapienza, University of Milan, Radboud University Nijmegen, Masaryk University, University of Bergen
Pages: D38-D47
Publication date: 2016
Peer-reviewed: Yes
