Trends and EIE higher education response to the current global technical challenges - DTU Orbit (17/12/2018)

**Trends and EIE higher education response to the current global technical challenges**

The European Association for Education in Electrical and Information Engineering (EAEEIE) has been for 20 years and still is dedicated to supporting Electrical and Information Engineering (EIE) across Europe. Its new Strategic Alignment of Electrical and Information Engineering in European Higher Education Institutions (SALEIE), an EU supported project, gathers together a global team aiming to provide higher education models in the EIE disciplines that can respond to the key global technical challenges. This paper deals with findings within the SALEIE project’s work package WP3 (Global Challenges), namely: state-of-the-art in implementation of the Bologna recommendation for Bachelor and Master, technical challenges that the EIE higher education faces nowadays, and existing models in EIE higher education and their degree of response to key global technical challenges.

**General information**

State: Published
Organisations: Center for Bachelor of Engineering Studies, Afdelingen for El-teknologi, Gheorghe Asachi Technical University of Iasi, University of Craiova, Technical University of Cluj-Napoca, Vasile Goldi Western University of Arad, University of York
Number of pages: 4
Pages: 65-68
Publication date: 2014

**Host publication information**

Title of host publication: Proceedings of the 25th Annual Conference on European Association for Education in Electrical and Information Engineering
Publisher: IEEE
ISBN (Print): 978-1-4799-4205-3
Keywords: electrical engineering, further education, Communication, Networking and Broadcast Technologies, Components, Circuits, Devices and Systems, Engineering Profession, General Topics for Engineers, Robotics and Control Systems, Signal Processing and Analysis, Bologna, EAEEIE, Education, EIE higher education, EIE higher education response, electrical and information engineering, EU supported project, Europe, European Association for Education in Electrical and Information Engineering, global technical challenges, learning outcomes, Nanotechnology, SALEIE, Strategic Alignment of Electrical and Information Engineering in European Higher Education Institutions
