Tunable on chip optofluidic laser

On chip tunable laser is demonstrated by realizing a microfluidic droplet array. The periodicity is controlled by the pressure applied to two separate inlets, allowing to tune the lasing frequency over a broad spectral range.

General information
State: Published
Organisations: Department of Micro- and Nanotechnology, Optofluidics, Hebrew University of Jerusalem
Contributors: Bakal, A., Vannahme, C., Kristensen, A., Levy, U.
Number of pages: 2
Publication date: 2016

Host publication information
Title of host publication: Proceedings of 2016 Conference on Lasers and Electro-Optics
ISBN (Print): 978-1-5090-2434-6
Keywords: Laser tuning, Laser modes, Microfluidics, Oils, Laser excitation, Laser applications
Source: FindIt
Source-ID: 2350001014
Research output: Research - peer-review › Conference abstract in proceedings – Annual report year: 2016
