Wind Energy literature survey no. 24 - DTU Orbit (24/12/2018)

As a service to readers, Wind Energy regularly conducts literature surveys and publishes lists of relevant articles drawn from recent issues of a large number of periodicals including the Journal of Wind Engineering and Industrial Aerodynamics, International Journal of Energy Research, Renewable Energy, Energy Sources, Journal of Solar Energy Engineering, American Institute of Aeronautics and Astronautics Journal, and Electric Power Components and Systems along with a number of periodicals published by the Institute of Electrical and Electronics Engineers, and so on. The list is limited exclusively to journals not specifically devoted to wind energy and its applications. For the reader to be assisted, the list is separated into broad categories. Although many papers fit several categories, each paper is listed only once under the category thought most appropriate. Please note that the inclusion in the list is not an endorsement of a paper’s quality. This is compiled by Lars Christian Henriksen, Wind Energy Department, Risø National Laboratory for Sustainable Energy, Technical University of Denmark, PO Box 49, DK-4000 Roskilde, Denmark. Please e-mail any suggestions to larh@risoe.dtu.dk.

General information
State: Published
Organisations: Department of Wind Energy, Aeroelastic Design
Contributors: Henriksen, L. C.
Pages: 661–664
Publication date: 2012
Peer-reviewed: Yes

Publication information
Journal: Wind Energy
Volume: 15
ISSN (Print): 1095-4244
Ratings:
