One Health Surveillance includes the systematic collection, validation, analysis, interpretation of data to support decision making. However, a harmonized approach for One Health Surveillance (OHS) data annotation is currently missing.

**ORION Project Aims**

1. Establishing and strengthening inter-institutional collaboration and transdisciplinary knowledge transfer in the area of surveillance data integration and interpretation.

2. Implement a prototype of an integrated strategy for long-term consolidation and harmonization of One Health Surveillance (OHS) solutions. ➔ "OHS harmonization framework"

**Work Plan (Project duration: 2018-2020)**

<table>
<thead>
<tr>
<th>WP1 - OH Surveillance Codex</th>
<th>WP2 - OHS Knowledge Hub</th>
<th>WP3 - OHS Infrastructure Resources</th>
<th>WP4 - Training &amp; Sustainability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inventories and requirement analysis</td>
<td>Improvements and new resources</td>
<td>Evaluation</td>
<td></td>
</tr>
<tr>
<td>• High level guidance for harmonised, cross-sectional description and categorisation of surveillance data covering all surveillance phases and all knowledge types.</td>
<td>• Cross-domain inventory of available data sources, methods / algorithms / tools and initiatives that support OHS surveillance data generation, data analysis, modelling and decision-making.</td>
<td>• Technical and infrastructural resources for harmonization and integration of surveillance data and methods.</td>
<td>• Shared technical resources</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Harmonized data standards, software libraries, ontologies, terminology mappings, software tools supporting the adoption of the &quot;OHS Surveillance Codex&quot;.</td>
<td>• Development of a &quot;Sustainability Roadmap&quot; for broad adoption of project results in future European surveillance practice</td>
</tr>
</tbody>
</table>
