ORION PROJECT AIMS

1. Establishing and strengthening inter-institutional collaboration and transdisciplinary knowledge transfer in the area of surveillance data integration and interpretation.

2. Implement a prototype of an integrated strategy for long-term consolidation and harmonization of One Health Surveillance (OHS) solutions. „OHS harmonization framework“

WORK PLAN (PROJECT DURATION: 2018-2020)

WP1 - OH Surveillance Codex

- High level guidance for harmonised, cross-sectional description and categorisation of surveillance data covering all surveillance phases and all knowledge types.

WP2 - OHS Knowledge Hub

- Cross-domain inventory of available data sources, methods / algorithms / tools and initiatives that support OH surveillance data generation, data analysis, modelling and decision-making.
- Cross-domain pilot studies to explore and validate selected initiatives.

WP3 - OHS Infrastructure Resources

- Technical and infrastructural resources for harmonization and integration of surveillance data and methods.
- Harmonized data standards, software libraries, ontologies, terminology mappings, software tools supporting the adoption of the “OH Surveillance Codex”.

WP4 - Training & Sustainability

- Shared technical resources
- Development of a “Sustainability Roadmap” for broad adoption of project results in future European surveillance practice
