Search result (research units) - DTU Orbit (20/10/2019)

**Responsible Research and Innovation**

Innovation
Short name: Responsible Research and Innovation

**Addresses**

Type of address: Postal address
Street: Produktionstorvet
Building: Building 424
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

**Phone numbers**
Phone: +45 4525 4708

**Web addresses**
Web: https://www.man.dtu.dk/

**Emails**
E-mail: info@man.dtu.dk
Organisational unit: Group

**Engineering Systems Design**

Innovation
Short name: Engineering Systems Design

**Addresses**

Type of address: Postal address
Street: Produktionstorvet
Building: 426
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

**Phone numbers**
Phone: +45 4525 4800

**Web addresses**
Web: https://www.man.dtu.dk/

**Emails**
E-mail: info@man.dtu.dk
Organisational unit: Group

**Geodesy and Geodynamics**

National Space Institute
Short name: Geodesy and Geodynamics

**Addresses**
Type of address: Postal address
Street: Elektrovej
Building: 327+328
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Phone numbers
Phone: (+45) 4525 9500
Fax: (+45) 4525 9575

Web addresses
Web: https://www.space.dtu.dk/english/research/research_divisions/geodesy_and_geodynamics

Emails
E-mail: office@space.dtu.dk
Organisational unit: Section

Personalized Health Technology
Digital Health
Short name: Personalized Health Technology

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Business Models and Finance
UNEP DTU Partnership
Short name: Business Models and Finance

Addresses
Type of address: Postal address
Street: Marmorvej 51
Postal code: DK-2100
City: Copenhagen Ø
Country: Denmark
Phone numbers
Phone: +45 45 33 52 50

Web addresses
Web: http://www.unepdtu.org/
Organisational unit: Group

Institutional Development
UNEP DTU Partnership
Short name: Institutional Development

Addresses
Type of address: Postal address
Street: Marmorvej 51
Postal code: DK-2100
City: Copenhagen Ø
Country: Denmark

Phone numbers
Phone: +45 45 33 52 50

Web addresses
Web: http://www.unepdtu.org/
Organisational unit: Group

Technology - Transitions and System Innovation
UNEP DTU Partnership
Short name: Technology - Transitions and System Innovation

Addresses
Type of address: Postal address
Street: Marmorvej 51
Postal code: DK-2100
City: Copenhagen Ø
Country: Denmark

Phone numbers
Phone: +45 45 33 52 50

Web addresses
Web: http://www.unepdtu.org/
Organisational unit: Group

Impact Assessment and Adaptation Analysis
UNEP DTU Partnership
Short name: Impact Assessment and Adaptation Analysis

Addresses
Type of address: Postal address
Street: Marmorvej 51
Postal code: DK-2100
City: Copenhagen Ø
Country: Denmark

**Phone numbers**
Phone: +45 45 33 52 50

**Web addresses**
Web: http://www.unepdtu.org/
Organisational unit: Group

**Mitigation Analysis and Data Management**
UNEP DTU Partnership
Short name: Mitigation Analysis and Data Management

**Addresses**
Type of address: Postal address
Street: Marmorvej 51
Postal code: DK-2100
City: Copenhagen Ø
Country: Denmark

**Phone numbers**
Phone: +45 45 33 52 50

**Web addresses**
Web: http://www.unepdtu.org/
Organisational unit: Group

**Transport Psychology**
Transport
Short name: Transport Psychology

**Addresses**
Type of address: Postal address
Street: Produktionstorvet
Building: Building 424
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

**Phone numbers**
Phone: +45 4525 4708

**Web addresses**
Web: https://www.man.dtu.dk/english

**Emails**
E-mail: info@man.dtu.dk
Organisational unit: Group
Transport Economics
Transport
Short name: Transport Economics

Addresses
Type of address: Postal address
Street: Produktionstorvet
Building: Building 424
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Phone numbers
Phone: +45 4525 4708

Web addresses
Web: https://www.man.dtu.dk/english

Emails
E-mail: info@man.dtu.dk
Organisational unit: Group

Transport Demand
Transport
Short name: Transport Demand

Addresses
Type of address: Postal address
Street: Produktionstorvet
Building: Building 424
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Phone numbers
Phone: +45 4525 4708

Web addresses
Web: https://www.man.dtu.dk/english

Emails
E-mail: info@man.dtu.dk
Organisational unit: Group

Machine Learning
Transport
Short name: Machine Learning

Addresses
Type of address: Postal address
Street: Produktionstorvet
Building: Building 424
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Phone numbers
Phone: +45 4525 4708

Web addresses
Web: https://www.man.dtu.dk/english

Emails
E-mail: info@man.dtu.dk
Organisational unit: Group

Network and Route Choice
Transport
Short name: Network and Route Choice

Addresses
Type of address: Postal address
Street: Produktionstorvet
Building: Building 424
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Phone numbers
Phone: +45 4525 4708

Web addresses

Transport
Department of Technology, Management and Economics
Short name: Transport

Addresses
Type of address: Postal address
Street: Produktionstorvet
Building: Building 424
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Phone numbers
Phone: +45 4525 4708

Web addresses
Web: https://www.man.dtu.dk/english

Emails
E-mail: info@man.dtu.dk
Organisational unit: Section

Energy Systems Analysis
Sustainability
Short name: Energy Systems Analysis

Addresses
Type of address: Postal address
Street: Produktionstorvet
Building: Building 424
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Phone numbers
Phone: +45 4525 4708

Web addresses
Web: https://www.man.dtu.dk/english

Emails
E-mail: info@man.dtu.dk
Organisational unit: Group

Energy Economics and Regulation
Sustainability
Short name: Energy Economics and Regulation

Addresses
Type of address: Postal address
Street: Produktionstorvet
Building: Building 424
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Phone numbers
Phone: +45 4525 4708

Organisational unit: Section

Polymer Cell
Immunobiology and Biomimetics
Short name: Polymer Cell

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Bioinspired Nanomaterials Group
Immunobiology and Biomimetics
Short name: Bioinspired Nanomaterials Group

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Biomimetics, Biocarriers and Bioimplants
Immunobiology and Biomimetics
Short name: Biomimetics, Biocarriers and Bioimplants

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Centre for Technology Entrepreneurship
Technical University of Denmark
Short name: DTU Entrepreneurship

Addresses
Type of address: Postal address
Street: Produktionstorvet
Building: Building 426A, 1st floor
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: https://www.entrepreneurship.dtu.dk/
Organisational unit: Department

Immunological Memory Group
Immunobiology and Biomimetics
Short name: Immunological Memory Group

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Mucosal Immunity to Viruses
Immunobiology and Biomimetics
Short name: Mucosal Immunity to Viruses

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Mucosal Immunology
Immunobiology and Biomimetics
Short name: Mucosal Immunology

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
T-Cells and Cancer
Experimental & Translational Immunology
Short name: T-Cells and Cancer

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Nanomaterials and Nanobiosensors
Experimental & Translational Immunology
Short name: Nanomaterials and Nanobiosensors

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Adaptive Immunology
Experimental & Translational Immunology
Short name: Adaptive Immunology

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

T-Cell Signaling and Development
Experimental & Translational Immunology
Short name: T-Cell Signaling and Development

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Colloids & Biological Interfaces
Biotherapeutic Engineering and Drug Targeting
Short name: Colloids & Biological Interfaces

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english
Organisational unit: Group
Tailored Materials and Tissues
Biotherapeutic Engineering and Drug Targeting
Short name: Tailored Materials and Tissues

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Ocular Drug Delivery
Biotherapeutic Engineering and Drug Targeting
Short name: ODD

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Biologically Inspired Material Engineering
Biotherapeutic Engineering and Drug Targeting
Short name: BioEngine

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark
**Web addresses**
Web: http://www.healthtech.dtu.dk/english

**Emails**
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

**Immunobiology and Biomimetics**
Department of Health Technology
Short name: IBM

**Addresses**
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

**Web addresses**
Web: http://www.healthtech.dtu.dk/english

**Emails**
E-mail: healthtech-info@dtu.dk
Organisational unit: Section

**Experimental & Translational Immunology**
Department of Health Technology
Short name: XTI

**Addresses**
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

**Web addresses**
Web: http://www.healthtech.dtu.dk/english

**Emails**
E-mail: healthtech-info@dtu.dk
Organisational unit: Section

**Biotherapeutic Engineering and Drug Targeting**
Department of Health Technology
Short name: Biotherapeutic Engineering and Drug Targeting
Addresses
Type of address: Postal address
Street: Ørsted Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Section

Brain Computer Interface
Digital Health
Short name: Brain Computer Interface

Addresses
Type of address: Postal address
Street: Ørsted Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Biomedical Signal Processing
Digital Health
Short name: Biomedical Signal Processing

Addresses
Type of address: Postal address
Street: Ørsted Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english
Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Hearing Systems Group
Hearing Systems
Short name: Hearing Systems Group

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Bayesian modeling, Machine learning, Molecular Evolution, and Metagenomics
Bioinformatics
Short name: BMEM

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

AI for Immunological Molecules
Bioinformatics
Short name: AIM

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Disease Data Intelligence
Bioinformatics
Short name: Disease Data Intelligence

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Integrative Systems Biology
Bioinformatics
Short name: Integrative Systems Biology

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group
Immunoinformatics and Machine Learning
Bioinformatics
Short name: Immunoinformatics and Machine Learning

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Cancer Genomics
Bioinformatics
Short name: Cancer Genomics

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Digital Health
Department of Health Technology
Short name: Digital Health

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark
**Web addresses**
Web: http://www.healthtech.dtu.dk/english

**Emails**
E-mail: healthtech-info@dtu.dk
Organisational unit: Section

**Hearing Systems**
Department of Health Technology
Short name: Hearing Systems

**Addresses**
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

**Web addresses**
Web: http://www.healthtech.dtu.dk/english

**Emails**
E-mail: healthtech-info@dtu.dk
Organisational unit: Section

**Bioinformatics**
Department of Health Technology
Short name: Bioinformatics

**Addresses**
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

**Web addresses**
Web: http://www.healthtech.dtu.dk/english

**Emails**
E-mail: healthtech-info@dtu.dk
Organisational unit: Section

**Optofluidics**
Nano and Bio-physical Systems
Short name: Optofluidics
Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Stochastic Systems and Signals
Nano and Bio-physical Systems
Short name: Stochastic Systems and Signals

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Magnetic Systems
Nano and Bio-physical Systems
Short name: Magnetic Systems

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english
Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Nanofluidics and Bioimaging
Nano and Bio-physical Systems
Short name: Nanofluidics and Bioimaging

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Fluidic Array Systems and Technology
Nano and Bio-physical Systems
Short name: Fluidic Array Systems and Technology

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Nanoprobes
Drug Delivery and Sensing
Short name: Nanoprobes

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Cardiovascular Biomechanics
Biomedical Engineering
Short name: Cardiovascular Biomechanics

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

InterCranial Pressure Monitoring & Educational Research
Biomedical Engineering
Short name: InterCranial Pressure Monitoring & Educational Research

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group
Imaging of Subcellular Life
Biomedical Engineering
Short name: Imaging of Subcellular Life

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Cellular Signalling & Biotransport
Biomedical Engineering
Short name: Cellular Signalling & Biotransport

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Medical Image Computing
Biomedical Engineering
Short name: Medical Image Computing

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark
Biophotonic Imaging
Biomedical Engineering
Short name: Biophotonic Imaging

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Mem Applied Sensors Group
Biomedical Engineering
Short name: Mem Applied Sensors Group

Addresses
Type of address: Postal address
Street: Ørsteds Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Center for Fast Ultrasound Imaging
Biomedical Engineering
Short name: Center for Fast Ultrasound Imaging
Addresses
Type of address: Postal address
Street: Ørsted Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Nano and Bio-physical Systems
Department of Health Technology
Short name: NanoBioPhys

Addresses
Type of address: Postal address
Street: Ørsted Plads
Building: Building 345C
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Web addresses
Web: http://www.healthtech.dtu.dk/english

Emails
E-mail: healthtech-info@dtu.dk
Organisational unit: Group

Drug Delivery and Sensing
Department of Health Technology
Short name: IDUN

Addresses
Type of address: Postal address
Street: Ørsted Plads
Building: Building 345C

Organisation profile
DTU Nanolab is the National Centre for Nano Fabrication and Characterization in Denmark and is owned by and located at the Technical University of Denmark (DTU). DTU Nanolab operates and maintains advanced processing equipment within 1350 m2, class 10-100, ISO 9001-certified, open access, pay-per-use cleanroom facilities.

The VILLUM Center for the Science for Sustainable Fuels and Chemicals
Centers
Short name: V-SUSTAIN

Web addresses
Web: http://www.v-sustain.dtu.dk/

Organisation profile
The VILLUM Center brings together a group of the world’s leading scientists from DTU, Stanford University, University of Copenhagen (KU) and University of Southern Denmark (SDU) - all of which have worked closely together over the past ten years to exploit the synergies between their various areas of expertise in theory and experimentation. The center is headed by Professor Ib Chorkendorff and based at DTU. The centre has been made possible by an anniversary grant of DKK 150 million from the VILLUM FONDEN to mark the VKR Group's 75-year anniversary.

**Organisation profile**

**Head of Department:** Bjarke Bak Christensen

The department addresses important social and scientific challenges within biotechnology, biomedicine, food technology and human health. The department engages in both basic research and applied research and employs a number of basic tools from biochemistry, biophysics, chemistry, cell biology, immunology, microbial ecology and physiology, bioinformatics, and bioengineering. DTU Bioengineering has four research platforms that provide state-of-the-art research within fermentation and high-throughput screening, metabolomics-based mass spectrometry, proteomics, and genomics.

The IFR division works on public sector consultancy projects that benefit Danish business and society. These include Polar DTU and the DTU Space Dronecenter.

**Polar DTU**

Polar DTU - a one stop shop for DTU’s Polar activities

DTU has more than 100 years of experience in Arctic and Antarctic conditions. All this experience is being combined in Polar DTU, an interdisciplinary centre that brings together the knowledge and research from departments and centres from all over DTU.
The purpose of the centre is to make all of DTU’s research, know-how and new technologies available to private enterprises and international authorities operating in the Polar Regions. This guarantees the provision of research-based services that draw on the interdisciplinary knowledge of the departments involved. In addition to this, Polar DTU can call on a strong international network of research institutions.

Organisation profile
Head of division Allan Hornstrup
The Division for Astrophysics and Atmospheric Physics studies physical processes in stars, galaxies, galaxy clusters and the universe as a whole, as well as doing research and development of instrumentation that can be used to observe these objects. We also study our atmosphere, where Earth meets space, and the complex interactions that occur there. Research is concentrated in a handful of main areas:

- Large-scale structure of the universe, including the creation of galaxies and galaxy clusters.
- Physical conditions and processes inside and around neutron stars and black holes.
- Mapping the Cosmic Microwave Background to understand the Big Bang and early evolution of the Universe
- Electrical Discharges in the Upper Atmosphere
- Cosmic rays and their effect on the Earth's weather and climate
- Space weather and monitoring solar activity
- Technological development of x-ray and gamma-ray detectors and instruments, as well as mechanical structures for use in space-based observatories.

Organisation profile
Director: Bo Cerup-Simonsen
M: +45 21 78 94 03
In 2014, the partners in the Danish Underground Consortium (DUC) entered into an agreement on the financing of the Danish Hydrocarbon Research and Technology Centre (DHRTC), which has been established at and is operated from Technical University of Denmark (DTU).

For DHRTC, the aim is to demonstrate how the recovery of oil and gas can be increased in the Danish part of the North Sea on a commercial basis. Specifically, the aim is to demonstrate an increased recovery of oil and gas of 100 MMBOE in 2020. The centre's work involves close collaboration between research and engineering on coming up with innovative solutions to the challenges in the North Sea. This is done through research and partnerships across universities and in interaction with the industry.
Permanently based at DTU, the team is already busily involved in the collaboration with the partner institutions, University of Copenhagen, Aarhus University, Aalborg University and the Geological Survey of Greenland and Denmark (GEUS). In addition, efforts are being made to establish cross-disciplinary partnerships with foreign institutions and private enterprises with a view to conducting research into and developing new technologies for recovering a larger share of Denmark’s oil and gas from the North Sea.

DHRTC is a global centre from which researchers can access important data and knowledge about the oil fields, and our research programmes are orchestrated from the centre in partnership with research groups from our partner institutions. The aim of DHRTC at DTU is to ensure that all our efforts are finely coordinated across fields of research and professions, across departmental boundaries and—in the long term—across national borders as well.

The aim over the next four years is to identify and develop a number of large demonstration models, each addressing a potential for increasing Danish oil recovery and demonstrating how much oil and gas the models will be able to deliver.

Centre of Excellence for Silicon Photonics for Optical Communications

Centers
Short name: Centre of Excellence for Silicon Photonics for Optical Communications
Main Research Area: Technical/natural sciences

Web addresses
Web: http://www.s poc. du. dk/

Organisation profile
The SPOC centre addresses the optical communication infrastructures of the future. In an interdisciplinary approach, relying on physics, nonlinear optics, photonic communication technologies, information theory and advanced coding, we aim to find solutions to the major challenges of communication systems.

The energy consumption and potential capacity
We will explore optical signal processing in photonic wires for orders of magnitude improvements in bandwidth and energy efficiency, and conduct fundamental research on optical silicon chips and integration technologies addressing ultimate-capacity optical communications.
We will explore spatially distributed data transmission for orders of magnitude higher data densities. We will explore information and coding theory for optimum spectral-efficiency. We will explore frequency comb generation for light sources and for unprecedented ultra-precise optical clocks and frequency references, and we will explore future quantum communication channels with impenetrable security.

Center for Intelligent Drug Delivery and Sensing Using Microcontainers and Nanomechanics
Centers
Short name: IDUN

Web addresses
Web: http://www.idun.dtu.dk/

Organisation profile
IDUN is a center of excellence funded by the Danish National Research Foundation and the Villum Foundation. The center is divided into two parts: IDUN Drug and IDUN Sensor, focusing on the main research areas of drug delivery and nanomechanical sensors.

With the two main research areas in close contact at the center, IDUN will be exploring the great synergy between sensor development and search for new pharmaceutical tools and materials. IDUN Sensor will, through IDUN Drug, get access to unique polymers and biomolecules. Through IDUN Sensor, IDUN Drug will be able to characterize, among others, small volumes of materials and molecules, which are today not possible to analyze by any standard technologies. By maintaining and strengthening the coupling between sensor and material development, IDUN creates a unique international environment with high creativity across scientific borders.

**Center for Nanostructured Graphene**

Centers

Short name: Center for Nanostructured Graphene

Web addresses

Web: http://www.cng.dtu.dk/

Organisation profile

CNG – Center for Nanostructured Graphene – is funded by the Danish National Research Foundation (Danmarks Grundforskningsfond), with a 54 mill. Dkr grant, starting in February 2012 and running initially for six years.

The main partners in CNG are DTU Fotonik, DTU Fysik, DTU CEN, Aalborg University and DTU Nanotech which is the main stake-holder. The center is headed by Prof. Antti-Pekka Jauho from DTU Nanotech. The grant from DNRF finances the research carried out by ten junior researchers (ph.d students and post-docs). In addition, many other researchers on the DTU campus are independently financed stake-holders in CNG’s research program, so that all in all more than sixty persons contribute towards CNG’s goals (Oct 2013).

CNG focuses on basic research, but all its research projects have long-time perspectives which the aim at applications. CNG’s research profile has a broad range: it involves polymer chemists, nanofabrication specialists, experimental physicists, and condensed matter theorists using a wide palette of analytical and numerical techniques, including large scale simulations of nanodevices, ab initio electronic structure calculations, and theory of quantum transport.

Organisational unit: Center

**Centre for Product Modelling**

Fax: (+45) 4593 4467

Web addresses

Web: http://www.productmodels.com/

Emails

E-mail: csc@man.dtu.dk

Organisation profile

The Centre for Product Modelling (CPM) is a Danish research institution under the Department of Management Engineering at the Technical University of Denmark. CPM is dedicated to researching automation of routine engineering
tasks in the product specification process. CPM has recently developed and tested a methodology for designing and implementing product models, which are used as product specification systems in configuration process.

By incorporating knowledge of e.g. the structure, function, production, transport, assembly, use etc. of a product into a product model, this knowledge is made accessible to other organisational units and is more easily shared with other units, both in-house and in relation to the customers and suppliers of the company.

CPM is also the driving force behind the Association for Product Modelling in Denmark, which is an association of firms interested in - and using - product models.

Product models can for example be used for:

The configuration of products in connection with sales/biddings. Either directly via the Internet or by using laptop PC's.

The automatic generating of product documentation for the purpose of company purchasing and production in connection with the executing of orders.

The support of detailed construction of custom-fit product variants.

In the Centre for Industrialisation of Engineering we focus on the construction of product models that can support the sales process.

This task comprises procedures for:

Analysing and developing already existing business processes for sales, biddings, and adaptation/documentation of products for individual customer needs.

Analysing the possibilities offered by product models and their incorporation in the overall business strategy of the company.

Constructing and implementing product models.

The procedures are developed by combining competencies within the business/strategic area, techniques for modelling and implementation of product models and organisational conditions.

**Organisation profile**

Centre for IT-Intelligent Energy System in Cities - CITIES

A wide range of research activities have arisen to support the Danish target of a 100% renewable energy system by 2050. Projects focused on individual aspects of the energy system, such as zero emissions buildings or intelligent power...
systems provide valuable insight, that facilitates flexibility throughout the energy system. CITIES will address this deficiency by establishing an integrated research centre covering all aspects of the energy system, including gas, power, district heating/cooling and biomass, and most importantly methods to forecast, control and optimize their interactions through the use of advanced ICT solutions.

The high densities of population, energy consumption, and energy and communications networks in cities offer the greatest potential for flexibility at the last cost, and the fact that cities account for 80% of global energy consumption and emissions [1] make the urban environment an ideal setting for energy systems integration research. CITIES will pioneer research into fully integrated city energy systems, building short-term operational models that feed longer term planning models, considering the spatiotemporal variations, interactions, dynamics and stochastics in the energy system. Low level models of system components will inform higher-level aggregate models employed in market and control framework design. The leading position of European academia and industry and the rapidly growing market for smart energy solutions indicates substantial scope for increased competitiveness and job creation within this field. CITIES will, in collaboration with its industrial and academic partners, conduct research with a view to developing tools for the implementation of integrated energy system solutions.

Objectives of the centre project

The societal objective of CITIES is to establish a realistic and concrete pathway to ultimately achieving independence from fossil fuels by harnessing the latent flexibility of the energy system through intelligence, integration, and planning, focusing on city environments and working towards both 2020 and 2050 European [2,3] and Danish goals [4].

The scientific objective of CITIES is to develop methodologies and ICT solutions for the analysis, operation and development of fully integrated urban energy systems. A holistic research approach will be developed that aims to provide solutions at all levels between the appliance and the total system, and at all time scales between operations and planning.

The educational objective of CITIES is to educate a generation of academics, engineers and entrepreneurs on the value and necessity of considering the energy system as a whole in a collaborative, integrated context, rather than focusing on a single facet or component.

The commercial perspective of CITIES is to identify and establish solutions which can form the background for commercial opportunities within the smart cities environment, and to support the development of these and other smart cities demonstration projects, including through a range of decision support tools to be developed as a result of our research efforts.

Key Outcomes of the CITIES

Operational methods and scenarios for energy systems integration and management, paving scenarios towards a fossil free future

Component level, modular and aggregate models of energy supply, consumption, and transmission, suitable for simulation, control and optimisation frameworks

Market structures that support energy systems integration

Modular forecasting and control models for a variety of energy system components, including their interactions

Integration of short-term operational models in models for long-term planning.

Models of energy consumption and production accounting for their stochastic and dynamic features.

Methods for controlling energy consumption and demand side management.

CITIES is aiming at being a leading knowledge centre for Smart Cities development and operational tools.

Synergies with existing and new smart cities development projects

Centre Management

Henrik Madsen Center Manager henrik.madsen@smart-cities-centre.org
Alfred Heller Deputy Center Manager alfred.heller@smart-cities-centre.org
Ivan T. Herrmann Chief Operation Manager ivan.t.herrmann@smart-cities-centre.org

Organisational unit: Center

Energy Analytics and Markets

Center for Electric Power and Energy
Short name: Energy Analytics and Markets
Main Research Area: Technical/natural sciences

Addresses

Type of address: Postal address
Street: Elektrovej
Organisation profile
Design of electricity markets and socio-economic optimization methods for market analysis and design, including power-system planning and operation analysis considering market aspects. Modeling and simulation of markets are central parts of the area, with emphasis on the stochastic and dynamic features of renewable energy generation and new patterns in electricity consumption at various temporal and spatial scales.

Organisational unit: Group

Organisation profile
Electric power system engineering especially addressing the impact of large-scale integration of renewable energy sources on power system stability, security and reliability.

Organisational unit: Group

Organisation profile

Energy System Management

Center for Electric Power and Energy
Short name: Energy System Management
Main Research Area: Technical/natural sciences
Addresses
Type of address: Postal address
Street: Elektrovej
Building: 325
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Phone numbers
Phone: (+45) 4525 3500

Web addresses
Web: http://www.cee.elektro.dtu.dk/

Emails
E-mail: cet@elektro.dtu.dk

Organisation profile
Analyses, modeling and development of new solutions for management and operation of future active power distribution systems with high penetration of RES and controllable DER and for integration of large-scale controllable DER into the power system.
Organisational unit: Group

Distributed Energy Resources
Center for Electric Power and Energy
Short name: Distributed Energy Resources
Main Research Area: Technical/natural sciences

Addresses
Type of address: Postal address
Street: Elektrovej
Building: 325
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

Phone numbers
Phone: (+45) 4525 3500

Web addresses
Web: http://www.cee.elektro.dtu.dk/

Emails
E-mail: cet@elektro.dtu.dk

Organisation profile
Distributed energy resource technologies addressing in particular their properties, their local coordination, their grid integration and the services they provide for the system.
Organisational unit: Group

Electric Equipment Technologies
Center for Electric Power and Energy
Short name: Electric Equipment Technologies
Main Research Area: Technical/natural sciences

Addresses
Type of address: Postal address
Street: Elektrovej
Building: 325
Postal code: DK-2800
City: Kgs. Lyngby
Country: Denmark

The Division of Geomagnetism uses magnetic field measurements from satellites and ground stations to explore the Earth. The magnetic field provides valuable knowledge about Earth's interior, because its slow variations reflect movements of the material in the core, rapid field changes depend on the electrical conductivity of the upper mantle, and because small wavelengths features can be used to map crustal structures. The magnetic field can also be used to explore the upper atmosphere (ionosphere and magnetosphere) and its connection with processes on the Sun.

The division’s activities primarily focus on:

- measuring Earth's magnetic field
- investigating the underlying physical processes producing the field and its variations
- developing methods to separate the different contributions from the core, crust and the Earth's upper atmosphere (ionosphere and magnetosphere)
- developing and calibrating instruments to measure the Earth's magnetic field, which are used in observatories around the world.

Organisation profile
Center for Electric Power and Energy (CEE) addresses one of the major challenges of our modern society: the development of a reliable, cost-efficient and sustainable energy system based on renewable energy. CEE supports the ongoing transformation of the energy system by developing a range of new technologies and solutions as well as the underlying new knowledge, theory and methods.
CEE is a center under DTU Electrical Engineering.
The center holds competences within:

Electric components
Electric power systems
Electricity markets and energy analytics
Energy resources, control and services
Energy system operation and management

Organisation profile
Education
The Section and the Department offers a Msc in Coastal and Maritime Engineering and other attractive study opportunities, for instance the study to be a Naval Architect.
Research
The research of the section is concentrated on the following subjects:

Stochastic wave loads on ships and offshore structures

Parametric roll of ships

Propeller flows

Wave dynamics

Collision and grounding

Risk models for navigational safety

Monitoring and decision support

Composite materials

Structural mechanics

Sediment transport

Liquifaction

Scour and scour protection

Business
The Section collaborates with national as well as international companies, institutions and individuals, and the section is continuously adjusting and extending this collaboration network.

Organisation profile
Center for Fluid Dynamics at DTU, Fluid•DTU, is a collaboration between five departments at the Technical University of Denmark all working on different aspects of fluid dynamics. All aspects of fluid dynamics are of interest to Fluid•DTU. Some of the main research themes are: Instability, bifurcation and chaos, drops, bubbles and interfaces, vortex dynamics, fluid dynamics at small length scales, and dynamics of complex fluids.

CAHR is a centre at DTU Electrical Engineering with the purpose of promoting research and education within the field of acoustic communication with emphasis on:

- Signal processing principles in the human auditory system
- Perceptual consequences of hearing impairment
- Final models of auditory processing and perception
- Applications of auditory models in hearing instruments
- Measurement and diagnosis of auditory function
- Technical audiology and Speech perception

The centre is supported by three Danish hearing-aid companies Oticon, Widex and GN Resound and their foundations.

Organisation profile
Arctic Technology Centre, Artek, was formally established in late summer 2000 to teach and provide in-service training for Greenlandic and Danish students and businessmen in Arctic technology. Artek also runs courses and seminars about Arctic conditions and contributes to research into Arctic technology. As a forerunner to the centre, various courses have been held about Arctic conditions over the last couple of years.
The Arctic Technology Centre is a collaboration between Sanaaartormeq Ilinniarfik (the Building and Construction School) in Sisimiut and the Technical University of Denmark in Lyngby.

In financial terms, Arctic Technology Centre is considered a DTU department with all the ensuing potential sources of revenue dependent on the number of students. The funding comes from the Greenland Government and from private foundations.

**Organisation profile**
Center for Nuclear Technologies is Denmark’s national competency center for nuclear technology. With roots in research in the peaceful use of nuclear power, DTU Nutech works with the applications of ionizing radiation and radioactive substances for the benefit of society.

The Hevesy Laboratory develops radiotracers for the diagnosing of particularly cancer. The center’s expertise in radiation dosimetry is used both for radiation sterilization, for medical purposes and for dating. A third field of application is the studies and analysis of radioactive isotopes in the environment, in food and in materials. The center also monitors radioactive substances and radiation levels in the Danish environment, contributing to the national nuclear emergency.

DTU Nutech is organised into three departments:

**The Hevesy Laboratory**

**Radiation Physics**

**Radioecology**
The Center includes the former Risø Workshop, which, among other things, produces a so-called Risø TL/OSL Reader. The instrument is developed at Risø DTU and can be used for dating soil and sediments, for controlling any radiation of food and for retrospective dosimetry.

**Center for Nuclear Technologies is located at DTU Risø Campus in Roskilde.**

**Organisation profile**

The research of the Fluid Mechanics Section focuses on aerodynamics, aero-acoustics and aero-elasticity of wind turbines and turbulence in wind farms. The fundamental research in fluid mechanics includes laminarturbulent transition, flow control, aero-acoustics, rotating flows, turbulence, and convection and heat transfer in boundary layers. In recent years, most activities have concentrated on research in offshore wind energy such as the development of computing codes for predicting the combined loadings from wind and waves, and wake interaction within wind farms. The research is carried out using Computational Fluid Dynamics (CFD), employing in-house developed as well as commercial computing codes, and experimental fluid mechanics (EFD), employing mostly optical methods, such as Laser Doppler Anemometry (LDA), Particle Image Velocimetry (PIV) and related techniques.

**Web addresses**
Evaluation of models and theories based on experimental work is fundamental to research in wind energy. Experimental methodologies are used both to test and evaluate theoretical models and to verify the performance of wind turbine designs and wind turbine component designs. This is a vital element in the understanding and quantification of the uncertainty in wind energy projects, and consequently an essential aspect in securing a competitive advantage of the wind energy industry.

The research of this section is aimed at the development of instrumentation and new methods for experimental determination of wind turbine characteristics, including test methods for the wind turbine industry. Special efforts are focused on remote sensing techniques using wind lidars. A major effort is the development of a new European research infrastructure called WindScanner. It is a laser-based remote sensing instrument for measurements of wind and turbulence in three dimensions around huge wind turbines.

The section also represents expertise in organising and conducting field meteorological measurements (wind resources and siting, boundary-layer meteorology, turbulence and aero-elastic design), and in providing instruments as well as data systems and data management for the Department of Wind Energy and external clients in the global wind industry. Research results are applied in international standards and also in national and international projects.

The Test and Measurement Section operates two test stations for large wind turbines at Høvsøre and Østerild on Jutland’s west coast. These areas have excellent conditions with high wind speeds and flat terrain. Therefore, we can verify both performance and the wind turbine design bases for all operating conditions relevant to large wind turbines up to 250 meters tall.

Organisation profile

Research
The Danish wind energy research environment is internationally recognized as being in the forefront of wind energy technology, and The Technical University of Denmark (DTU) has provided a major part of the wind energy research in Denmark.

Education
Based on intensive efforts in research, development, innovation and transfer of knowledge, the Technical University of Denmark (DTU) has for many years contributed to Denmark's leading position in wind energy.
Innovation
An important part of the work at DTU Wind Energy is that research results are disseminated and used by Danish industry in order to support and develop the entire sector. DTU Wind Energy contributes to industry and society’s knowledge about wind energy and related areas through innovation, technology transfer and research based services.

Organisation profile
Center for Energy Resource Engineering (CERE) is a continuation of Center for Phase Equilibria and Separation Processes (IVC-SEP).
CERE's main activities lie within applied thermodynamics, interface- and colloidal chemistry, geology and scientific computing. The center combines a range of disciplines of great importance in oil and gas production, CO2 capture and storage (CCS) and geothermal power. Additionally the center carries out generic research within the fundamental disciplines.
Research results are applied to processes and products in the industry with a main focus on energy, environment and advanced materials. A substantial part of the center’s research has been dedicated to Enhanced Oil Recovery (EOR).
Head of CERE per 1.7.2014 is professor Georgios M. Kontogeorgis

DTU Physics
DTU Physics focuses on research areas within modern physics with significant basic scientific challenges and also has clear application perspectives. The Department research ranges from studies of materials at the atomic scale, quantum physics and biophysics to the storage and use of renewable energy sources such as solar, wind and nuclear fusion.
Organisational unit: Department

Addresses
Education
The Electronics Group puts special pride into linking theory and modelling to the experimental test & validation of results. Through this a highly innovative environment has been established, educating engineering students at BEng, BSc, MSc and PhD levels.

Research
Our expertise in solving energy efficiency related problems and presenting innovative solutions is what makes the Electronics Group an essential part of numerous research projects in collaboration with industry. The Electronics Group is the most innovative group at the department with 13 out of 37 inventions since year 2000.
**Education**
At DTU Electrical Engineering we educate engineers within electrical engineering technologies as well as biomedical engineering.
We offer studies at BEng-, BSc-, MSc- and PhD levels. The department also participates in international master programmes.

**Research**
We conduct research within biomedical engineering, antenna and microwave technology, robot technology, power- and physical electronics, eletric technology, acoustic environment, audiology, and electro-acoustics.

A large part of our research is carried out in close interaction with industry and Research institutions in Denmark and abroad.

Organisation profile
The National Food Institute researches and communicates sustainable and value-adding solutions in the areas of food and health for the benefit of society and industry.
The institute’s tasks are carried out in a cross-disciplinary cooperation between the disciplines of nutrition, chemistry, toxicology, microbiology, epidemiology and technology.
The vision is that the National Food Institute creates welfare for the future through research into food and health. The institute makes a difference by producing knowledge and technical solutions which:

prevent disease and promote health
make it possible to feed the growing population
develop a sustainable food production

Organisation profile  
DTU Library, the Technical Information Center of Denmark, contributes  
to the realization of DTU’s mission and vision  
by securing an optimum information infrastructure and information service  
for both scientific and administrative processes  
and contributes to the study environment at DTU as well as interaction with our surroundings.  
This challenge comprises the entire information cycle of DTU in which  
information from all over the world is put at the disposal of and communicated to the users of DTU  
the information must be applied and utilized so that - together with other scientific activities at DTU – it results in new  
information being generated by the university  
this new information is collected, documented, filed and preserved  
and made public and disseminated via efficient and credit awarding channels  
after which the impact of the research can be analyzed and estimated.  

Mission  
The mission of DTU Library can thus be translated into five focus areas:  
Securing DTU’s scientific information provision and communication.  
Collecting, documenting and filing the information produced by DTU including the appertaining cases and projects.  
Contributing to the publication and dissemination of DTU’s scientific information and carry out analyses of the output and  
impact of the university.  
Contributing to an inspiring and attractive study environment at DTU.  
Contributing to DTU’s interaction with the surroundings and public image.  
The mission and the four user segments of DTU Library are illustrated below.

National Veterinary Institute DTU conducts research in infectious diseases in livestock and makes diagnoses in diseased animals. We give advice to public authorities and cooperate with them on the Danish veterinary contingency plan. We are reference laboratory in a number of areas.

National Veterinary Institute DTU encompasses all infectious animal diseases in farm livestock and companion animals. Our main focus is on notifiable diseases, as well as other serious infectious diseases that affect farm livestock.

Our tasks concern:

Research
Innovation

Diagnostics

Surveillance

Consultancy

Risk assessment

Production of vaccines and sera

Dissemination of knowledge and education

**We do research in diseases**
The Institute does research in methods to detect, control and prevent infectious animal diseases. Our research activities cover a wide field, i.e. developmental and application-oriented projects as well as basic research. The institute also hosts an international research centre for veterinary epidemiology, International EpiLab.

**We diagnose**
Veterinarians can submit samples from diseased animals to be diagnosed. For notifiable diseases the diagnosis is free, whereas we diagnose other diseases on commercial terms. All our diagnostic services are based on accredited or quality-assured analysis methods.

**We manufacture vaccines and sera**
For some animal diseases commercial vaccines and sera are not available. For the treatment of these diseases the National Veterinary Institute DTU manufactures vaccines and sera, if the disease is significant. Our production of vaccines and sera takes place on commercial terms.

**We give advice to public authorities**
The National Veterinary Institute DTU provides advisory services and risk assessment to public authorities, the industry and interest groups. Advisory services and risk assessment are both based on robust and sensitive research methods. In addition, we supply data for disease monitoring in Denmark and coordinate the national monitoring of veterinary drug use (Vetstat).

**We are responsible for the Danish veterinary contingency plan**
The National Veterinary Institute DTU is responsible for the laboratory component of the Danish veterinary contingency plan, which puts emergency procedures into action in the event of suspected or actual outbreaks of serious infectious animal diseases. In these cases our laboratories analyse samples from the animals. The contingency plan is supported by our activities in conjunction with a range of national monitoring programmes on animal diseases and zoonoses. Our research and diagnostics expertise is crucial for maintaining the high quality of the Danish veterinary contingency plan. The Danish Veterinary and Food Administration is responsible for the part of the contingency plan handling infection situations in Denmark.

**We are reference laboratory**
The institute is the Danish national reference laboratory for a long list of infectious animal diseases, and the EU and OIE reference laboratory for selected fish diseases.

**We cover relevant subject areas**
Professionally the institute covers all areas important to infectious diseases:

Pathology

Bacteriology
We are 220
The institute employs about 220 staff members and consists of the management, the secretariat and the service division. Furthermore we have these five sections:

Virology – focusing on serious virus infections, including virus infections transmitted from animals to humans (zoonotic infections).

Immunology and vaccinology – including development and optimization of new vaccines and other biological products.

Epidemiology – including disease modeling and climate-related changes in disease spread.

Bacteriology, pathology and parasitology - focusing on fish bacteriology, non-food-borne bacterial zoonoses and activities with a view to reducing the use of antibiotics. We also work on methods for characterizing multi-bacterial societies.

Public sector consultancy, contingency and commercial diagnostics.

**Emails**

E-mail: office@space.dtu.dk

**Organisation profile**

Head of division: John Leif Jørgensen  
Main research areas: Development of concepts, designs, implementations and verifications of the advanced high performance instruments for use on board spacecraft.

The Measurement and Instrumentation division develops high accuracy stellar reference units for spacecraft and science grade vector magnetometers for space and ground use. The division also works on optical detection and tracking sensors for space.

The division also develops optical formation flying sensors and autonomous sensor systems. These systems are refined by calibration techniques enabling full accuracy use. This calibration is done by the Measurement and Instrumentation division.

**Research plan**

Implementation of formation flying test lab and associated methods and techniques.

Inertial navigation techniques.

Sub-arcsecond techniques.

Interplanetary and planetary stellar magnetic measurement platforms  
Planetary lander systems and autonomy

**Applications of the technology**

In parallel to these general instrument improvements, other applications and technology uses have been pursued. This research has led to several novel measurement principles, which encompass multi-sensor-head star trackers for improved maneuverability, sub-arcsecond accuracy instruments, astronomical telescope field determination, miniature magnetometer packages for planetary landers, autonomous radiation impact handling and guider and rendezvous docking systems.

**Examples:**

European Space Agency missions: SWARM , PROBA1, PROBA2, SMART1
NASA missions: IBEX, MMS, JUNO
The Swedish National Space Board missions: PRISMA
JAXA missions: SmartSat

**Organisation profile**

**Education**
DTU Space offers a number of exciting study lines and courses within space research and space technology. With an education from DTU, you can become one of the people who set the agenda for future space research and contribute to monitoring and understanding climate change and the Earth's environment.

**Research**
Research at DTU Space is characterised by a strong interaction between basic research and technology development, and the Institute's projects often involve international co-operation.

Organisation profile
Department of Environmental Engineering (DTU Environment) works at the highest international level to develop new environmentally friendly & sustainable technologies and disseminate this knowledge to society and new generations of engineers. Our activities in research, teaching and innovation is focused on:

Air, Land & Water Resources
Environmental Fate & Effect of Chemicals
Residual Resource Engineering
Urban Water Systems
Water Technologies

Organisation profile

**Education**
The section offers teaching within the disciplines:
- Mechanics
- Strength of materials
- Mechanical vibrations
- Machine elements
- Composite materials
- Finite elements
- Plasticity and fracture mechanics

**Research**
Research groups at the section work with:
- Mechanics and strength of materials
- Vibration analysis
- Topology optimization
- Machine elements

**Business**
Solid Mechanics has extensive collaboration with companies, institutions and individuals, domestically and abroad, with a continuous adjustment and expansion of the network.
