Giuliano Bissacco - Research outputs - DTU Orbit (21/09/2019)

Biondani, Francesco et al. Comparison of cutting edge characterization techniques applied to industrial tools with sub micrometer edge radius. 2016. 2 p.

Pilny, Lukas, Giuliano Bissacco, and Leonardo De Chiffre The effect of scattered light sensor orientation on roughness measurement of curved polished surfaces. 2014. 1 p.

Hansen, Hans Nørgaard, Arnaud De Grave, and Giuliano Bissacco "Multidisciplinary graduate course and PhD summerschool in micromechanical system design and manufacture". proceedings of the EUSPEN. The European Society for Precision Engineering and Nanotechnology. 2008.

Bissacco, Giuliano Accuracy of axial depth of cut in micromilling operations - Simplified procedure and uncertainty model 2005.

Bissacco, Giuliano A software tool for simulation of surfaces generated by ball nose end milling IPL. 2004.

Bissacco, Giuliano Accuracy of depth of cut in micro milling operations Institut for Produktion og Ledelse, DTU. 2003.
Bissacco, Giuliano Micromilling experiments on hardened tool steel and Titanium Institut for Produktion og Ledelse, DTU. 2003.

Bissacco, Giuliano Preliminary Milling Tests on STAVAX ESR 52 HRC using 2 mm carbide tools in the range 20 – 200 m/min IPL. 2002.
