Intact stability analysis of dead ship conditions using FORM

An attempt to define critical wave and wind scenarios leading to capsize in beam sea

The Effects on the Operating Condition of a Passenger Ship Retro-fitted with a Composite Superstructure

Small Ro/Pax Vessel stability study

A Model for Prediction of Propulsion Power and Emissions – Tankers and Bulk Carriers

Back to basics

Environmental Performance Evaluation of Ro-Ro Passenger Ferry Transportation
Danish information paper for the work in the MEPC committee under The International Maritime Organisation, IMO in London, January 2012

Existing Design Trends for Tankers and Bulk Carriers - Design Changes for Improvement of the EEDI in the Future

Model for Environmental Assessment of Container Ship Transport

DTU offers solution to the EEDI ro-ro conundrum

Environmental performance evaluation of RoPax ferries

Environmental performance evaluation of ro-ro passenger ferry transportation

Environmental Performance Evaluation of Ro-Ro Passenger Ferry Transportation

How do we convert the transport sector to renewable energy and improve the sector's interplay with the energy system? Background paper for the workshop on transport - renewable energy in the transport sector and planning, Technical University of Denmark, 17-18 March 2009

State of the art report on design for X

Cargo transport by sea and road - Technical and economical environmental factors
