

EFSA publication 2012. EFSA EFSA ; Scientific Opinion on Flavouring Group Evaluation 99 (FGE.99): Consideration of furanone derivatives evaluated by the JECFA (63rd, 65th and 69th meetings). Parma, Italy: European Food Safety Authority. 30 p. (the EFSA Journal; No. 2901, Vol. 10(10)). https://doi.org/10.2903/j.efsa.2012.2901

EFSA publication 2012. EFSA Panel on Food Contact Material, Enzymes, Flavourings and Processing Aids (CEF); Scientific Opinion on Flavouring Group Evaluation 201Rev1: 2-Alkylated, aliphatic, acyclic alpha, beta-unsaturated aldehydes and precursors, with or without additional double-bonds, from chemical subgroup 1.1.2 of FGE.19. Parma, Italy: European Food Safety Authority. 28 p. (the EFSA Journal; No. 2749, Vol. 10(5)). https://doi.org/10.2903/j.efsa.2012.2749

EFSA publication 2012. EFSA Panel on Food Contact Material, Enzymes, Flavourings and Processing Aids (CEF); Scientific Opinion on Flavouring Group Evaluation 222: Consideration of genotoxicity data on representatives for alpha,betaunsaturated furyl derivatives with the α,β-unsaturation in the side chain from subgroup 4.6 of FGE.19 by EFSA. Parma, Italy: European Food Safety Authority. 18 p. (the EFSA Journal; No. 2748, Vol. 10(5)). https://doi.org/10.2903/j.efsa.2012.2748

EFSA publication 2012. EFSA Panel on Food Contact Material, Enzymes, Flavourings and Processing Aids (CEF); Scientific Opinion on Flavouring Group Evaluation 47, Revision 1: Bi- and tricyclic secondary, ketones and related esters from chemical groups 7 and 8. Parma, Italy: European Food Safety Authority. 43 p. (the EFSA Journal; No. 2637, Vol. 10(3)). https://doi.org/10.2903/j.efsa.2012.2637

EFSA publication 2012. EFSA Panel on Food Contact Material, Enzymes, Flavourings and Processing Aids (CEF); Scientific Opinion on Flavouring Group Evaluation 73, Revision 1: Consideration of alcyclic primary alcohols, aldehydes, acids and related esters evaluated by JECFA (59th meeting) structurally related to primary saturated or unsaturated alcyclic alcohol, aldehyde, and esters evaluated by EFSA in FGE.12Rev2 (2011). Parma, Italy: European Food Safety Authority. 26 p. (the EFSA Journal; No. 2638, Vol. 10(3)). https://doi.org/10.2903/j.efsa.2012.2638

EFSA publication 2012. EFSA Panel on Food Contact Materials, Enzymes, Flavourings and Processing Aids (CEF); Scientific Opinion on Flavouring Group Evaluation 08, Revision 4 (FGE.08Rev4): Aliphatic and alcyclic mono-, di-, tri-, and polysulphides with or without additional oxygenated functional groups from chemical groups 20 and 30. Parma, Italy: European Food Safety Authority. 138 p. (the EFSA Journal; No. 2455, Vol. 10(2)). https://doi.org/10.2903/j.efsa.2012.2455

EFSA publication 2012. EFSA Panel on Food Contact Materials, Enzymes, Flavourings and Processing Aids (CEF); Scientific Opinion on Flavouring Group Evaluation 08, Revision 5 (FGE.08Rev5): Aliphatic and alcyclic mono-, di-, tri-, and polysulphides with or without additional oxygenated functional groups from chemical groups 20 and 30. Parma, Italy: European Food Safety Authority. 139 p. (the EFSA Journal; No. 2837, Vol. 10(7)). https://doi.org/10.2903/j.efsa.2012.2837
for mennesker og dyr. Ministeriet for Fødevarer, Landbrug og Fiskeri.

EFSA Publication 2011. EFSA Panel on Food Contact Materials, Enzymes, Flavourings and Processing Aids (CEF); Scientific Opinion on Flavouring Group Evaluation 206 (FGE.206): Consideration of genotoxicity data on representatives for 12 alpha,beta-unsaturated ketones and precursors from chemical subgroup 1.2.3 of FGE.19 by EFSA. Parma, Italy:

EFSA Publication 2009. Scientific Opinion of the Panel on Food Additives and Nutrient Sources added to Food on a request from the Commission on selenious acid added for nutritional purposes to food supplements: Question No EFSA-Q-2006-278. European Food Safety Authority. (the EFSA Journal; No. 1009).

EFSA Publication 2009. Scientific Opinion of the Panel on Food Additives and Nutrient Sources added to Food on calcium caprylate and magnesium caprylate as a source of calcium and magnesium added for nutritional purposes to food supplements, following a request from the European Commission: Questions No EFSA-Q-2008-017, EFSA-Q-2008-018. European Food Safety Authority. (the EFSA Journal; No. 1146).

EFSA Publication 2009. Scientific Opinion of the Panel on Food Additives and Nutrient Sources added to Food on calcium phosphinate as a source of calcium added for nutritional purposes to food supplements following a request from the European Commission: Question No EFSA-Q-2006-279. European Food Safety Authority. (the EFSA Journal; No. 1054).

EFSA Publication 2009. Scientific Opinion of the Panel on Food Additives and Nutrient Sources added to Food on choline-stabilised orthosilicic acid added for nutritional purposes to food supplements following a request from the European Commission: Question No EFSA-Q-2006-189. European Food Safety Authority. (the EFSA Journal; No. 948).

EFSA Publication 2009. Scientific Opinion of the Panel on Food Additives and Nutrient Sources added to Food on iron (II) taurate, magnesium taurate and magnesium acetyl taurate as sources for iron or magnesium to be added as a nutritional substance in food supplements following a request from the European Commission: Question number EFSA-Q-2005-217,

EFSA Publication 2009. Scientific Opinion of the Panel on Food Additives, Flavourings, Processing Aids and Materials in Contact with Food on a request from Commission on Flavouring Group Evaluation 20, Revision 1 (FGE.20Rev1): Benzyl alcohols, benzaldehydes, a related acetal, benzoic acids and related esters from chemical group 23: Question No EFSA-

EFSA Publication 2009. Scientific Opinion of the Panel on Food Additives, Flavourings, Processing Aids and Materials in Contact with Food on a request from Commission on Flavouring Group Evaluation 64 (FGE.64). Consideration of aliphatic acyclic diols, triols, and related substances evaluated by JECFA (57th meeting) structurally related to aliphatic primary and secondary saturated and unsaturated alcohols, aldehydes, acetals, carboxylic acids and esters containing an additional oxygenated functional group and lactones from chemical groups 9, 13 and 30 evaluated by EFSA in FGE.10Rev1: Question No EFSA-Q-2008-032P. European Food Safety Authority. (the EFSA Journal; No. ON-975).

EFSA Publication 2008. Scientific Opinion of the Panel on Food Additives and Nutrient Sources added to Food (ANS) on a request from the Commission on benfotiamine, thiamine monophosphate chloride and thiamine pyrophosphate chloride, as sources of vitamin B1. European Food Safety Authority. 31 p. (the EFSA Journal; No. 864).

EFSA Publication 2008. Scientific Opinion of the Panel on Food Additives and Nutrient Sources added to food (ANS) on a request from the Commission on calcium L-threonate as a source for calcium added for nutritional purposes in food supplements: Question No EFSA Q-2005-158. European Food Safety Authority. 200 p. (the EFSA Journal; No. 866).

EFSA Publication 2008. Scientific Opinion of the Panel on Food Additives and Nutrient Sources added to Food (ANS) on a request from the Commission on pantethine as a source for pantothenic acid added as a nutritional substance in food supplements: Question No EFSA-Q-2006-227. European Food Safety Authority. 20 p. (the EFSA Journal; No. 865).

EFSA Publication 2008. Scientific Opinion of the Panel on Food Additives and Nutrient Sources added to Food on a request from the Commission on Calcium sulphate for use as a source of calcium in food supplements: Question No EFSA-Q-2005-075. European Food Safety Authority. 9 p. (the EFSA Journal; No. 814).

EFSA Publication 2008. Scientific opinion of the Panel on Food Additives, Flavourings, Processing Aids and Materials in contact with Food (AFC) on a request from the Commission on Camphor in flavourings and other food ingredients with flavouring properties: Question No EFSA-Q-2003-144. European Food Safety Authority. 15 p. (the EFSA Journal; No. 729).

EFSA Publication 2008. Scientific Opinion of the Panel on food additives, flavourings, processing aids and materials in contact with food (AFC) on a request from the Commission on Selenium-enriched yeast as source for selenium. European Food Safety Authority. 43 p. (EFSA Journal; No. 766).

EFSA Publication 2007. Opinion of the Scientific Panel on food additives, flavourings, processing aids and materials in contact with food (AFC) on a request related to a 14th list of substances for food contact materials. European Food Safety Authority. 10 p. (the EFSA Journal; No. 452-454).

EFSA Publication 2007. Opinion of the Scientific Panel on food additives, flavourings, processing aids and materials in contact with food (AFC) on a request related to a 15th list of substances for food contact materials. European Food Safety Authority. 12 p. (the EFSA Journal; No. 516-518).

EFSA Publication 2007. Opinion of the Scientific Panel on food additives, flavourings, processing aids and materials in contact with food (AFC) on a request related to a 17th list of substances for food contact materials. European Food Safety Authority. 24 p. (the EFSA Journal; No. 601-609).

EFSA Publication 2007. Opinion of the Scientific Panel on Food Additives, Flavourings, Processing Aids and Materials in Contact with Food on a request from the Commission related to Calcium, iron, magnesium, potassium and zinc L-pidolate as sources for calcium, iron, magnesium, potassium and zinc added for nutritional purposes to food supplements and to foods intended for particular nutritional uses. European Food Safety Authority. 10 p. (the EFSA Journal; No. 495-503).

EFSA Publication 2007. Scientific Opinion of the Panel on Food additives, Flavourings, Processing aids and Materials in Contact with food (AFC) on a request from the Commission on Calcium citrate malate as source for calcium intended for use in foods for Particular Nutritional Uses (PARNUTS) and in foods for the general population (including food supplements). European Food Safety Authority. 24 p. (the EFSA Journal; No. 612).

EFSA Publication 2007. Scientific Opinion of the Panel on food additives, flavourings, processing aids and materials in contact with food (AFC) on a request related to a 16th list of substances for food contact materials. European Food Safety Authority. 31 p. (the EFSA Journal; No. 555-563).

EFSA Publication 2006. Opinion of the Scientific Panel on Food Additives, Flavourings, Processing Aids and Materials in Contact with Food on a request from the Commission related to 2,2-BIS(4-HYDROXYPHENYL)PROPANE (Bisphenol A): Question No EFSA-Q-2005-100. European Food Safety Authority. 75 p. (the EFSA Journal; No. 428).

EFSA Publication 2006. Opinion of the Scientific Panel on Food Additives, Flavourings, Processing Aids and Materials in Contact with Food on the presence of 1,2-Benzisothiazolin-3-one as an impurity in saccharin used as a food additive: Question No EFSA-Q-2004-133. European Food Safety Authority. 7 p. (the EFSA Journal; No. 416).

Nielsen E, Larsen JC, Ladefoged O. 2005. Risk of adverse health effects from intake of contaminants in traditional Greenland diet. Poster session presented at 42nd Congress of The European Societies of Toxicology, Krakow, Poland.

EFSA Publication 2003. Opinion of the Scientific Committee on Food on chemically defined flavouring substances listed in the EU register, Flavouring Group Evaluation 1 (FGE.01): Branched-chain aliphatic saturated aldehydes, carboxylic acids and related esters of primary alcohols and branched-chain carboxylic acids from chemical groups 1 and 2. European Food Safety Authority.

EFSA Publication 2003. Opinion of the Scientific Committee on Food on chemically defined flavouring substances listed in the EU register, Flavouring Group Evaluation 2 (FGE.02): Branched- and straight-chain aliphatic saturated primary alcohols, aldehydes and related esters of primary alcohols and straight-chain carboxylic acids from chemical groups 1 and 2. European Food Safety Authority.
