A preliminary study on the pathogenicity of Bacillus licheniformis bacteria in immunodepressed mice

A preliminary study on the pathogenicity of Bacillus licheniformis bacteria in immunodepressed mice

The pathogenicity of 13 strains of Bacillus licheniformis was studied in immunodepressed mice. The strains had been isolated from cases of bovine abortions (n=5), bovine feedstuffs (n=3), soil (n=1), and grain products (n=2). The origin of two strains was unknown. Groups of 10 mice were inoculated intravenously with B. licheniformis bacteria at doses from...
